Step 3

This diagram illustrates the two installation methods for the wrist strap: using the cord for camera lugs that support it, and using the metal ring for other lug types. Each method is shown with three steps.

4.1. Attachment by Cord (Weight capacity \leq 5kg)

1. **Step 1:** Thread the thin cord loop through your camera's strap lug.
2. **Step 2:** Pass the main strap through the cord loop, ensuring it pulls taut.
3. **Step 3:** Pull the strap firmly to secure the knot formed by the cord loop against the camera lug.

4.2. Attachment by Metal Ring (Weight capacity \leq 4kg)

1. **Step 1:** Open the metal ring by gently prying it apart.
2. **Step 2:** Hook the open end of the metal ring onto your camera's strap lug.
3. **Step 3:** Close the metal ring completely, ensuring it is fully secured around the lug.

Wide Compatibility

Our wrist strap works well with all kinds of camera strap holes

This image illustrates the wide compatibility of the strap, showing various camera strap lug designs it can accommodate, including traditional eyelets and flat bar attachments.

5. OPERATING INSTRUCTIONS

Once installed, the wrist strap provides a secure and comfortable way to hold your camera.

Safe to Hold Your Camera in Hand

This wrist strap can help prevent your expensive camera from accidental falling

This image shows a user holding a camera with the wrist strap, emphasizing how it helps prevent accidental drops by keeping the camera securely attached to the hand.

5.1. Adjusting the Strap

The strap features an adjustable microfiber stopper to cinch the strap in place, accommodating various wrist sizes for a snug and secure fit.

Adjustable Size

Our strap is very soft and features a adjustable square buckle for varied wrist size

The image demonstrates the adjustable nature of the strap, showing how the leather ring can be slid to tighten or loosen the strap around the wrist for a customized fit.

To adjust, slide the leather ring along the braided nylon cord until the desired tightness is achieved around your wrist. This ensures the camera remains safely attached to your hand even if you momentarily lose grip.

6. CARE AND MAINTENANCE

Proper care will extend the life and maintain the appearance of your SMALLRIG Camera Wrist Strap.

Durable Material with High Quality

Made of soft leather and nylon
for more comfort, durability and reliability

Wrist straps generally have varying colors,
for they are made of leather

This image provides a detailed view of the strap's leather and nylon construction, highlighting the quality and texture of the materials used.

- **Cleaning:** For the leather parts, wipe gently with a soft, damp cloth. For the nylon braided cord, a mild soap solution can be used if necessary, followed by rinsing with clean water and air drying.
- **Drying:** Allow the strap to air dry completely if it gets wet. Do not use direct heat sources like hair dryers, as this can damage the leather and nylon.
- **Storage:** Store the strap in a cool, dry place away from direct sunlight and extreme temperatures.
- **Leather Care:** Periodically, a small amount of leather conditioner can be applied to the leather sections to keep them supple and prevent cracking. Note that leather colors may vary naturally and can change slightly over time with use.

7. TROUBLESHOOTING

This section addresses common concerns regarding the wrist strap.

- **Strap feels loose:** Ensure the adjustable leather ring is cinched tightly against your wrist. If using the cord attachment, verify the knot is pulled taut against the camera lug.

- Difficulty attaching:** Refer to Section 4 for detailed installation steps. Ensure you are using the correct attachment method (cord or metal ring) for your camera's specific lug type.
- Discoloration of leather:** This is normal for genuine leather and can occur due to natural variations, exposure to elements, and aging. Regular conditioning can help maintain its appearance.
