# GE LED+ A21 Smart LED Speaker Light Bulb with Remote

Model: 93129723

## 1. PRODUCT OVERVIEW

---

The GE LED+ A21 Smart LED Speaker Light Bulb combines multi-color lighting with a high-quality Bluetooth speaker. This bulb is designed for indoor use and offers both soft white and various color options, all controllable via an included wireless remote. No app, hub, or Wi-Fi is required for operation. It provides 760 lumens of brightness while consuming only 9 watts of power, equivalent to a traditional 60-watt incandescent bulb.

Figure 1: GE LED+ A21 Smart LED Speaker Light Bulb

## Key Features:

- **High-Quality Bluetooth Speaker:** Stream audio wirelessly from any Bluetooth-enabled device.
- **Simple Setup:** Connects via Bluetooth; no hub, Wi-Fi, or app needed.
- **Color Changing Light:** Choose from 8 different color settings or soft white light.
- **Energy Efficient:** Long-lasting LED technology uses only 9 watts.
- **Wireless Remote Control:** Adjust brightness, switch colors, control audio playback.
- **Multi-Bulb Sync:** Connect up to 10 LED+ speaker bulbs within 25 feet for surround sound.

## 2. SAFETY INFORMATION

**WARNING: This product contains a lithium button/coin cell battery. Keep coin cell batteries out of reach of children.**

- Do not use with standard dimmers.
- Suitable for damp locations.
- Not for use in totally enclosed luminaires.

- Ensure power is off before installation or removal.

### 3. PACKAGE CONTENTS

- One (1) GE LED+ A21 LED Speaker Light Bulb
- One (1) Wireless Remote Control
- One (1) Quick Start Guide

### 4. INSTALLATION

1. **Power Off:** Ensure the power to the light fixture is turned off at the switch before installation.
2. **Screw In Bulb:** Carefully screw the GE LED+ A21 Smart LED Speaker Light Bulb into a standard E26 medium base lamp or light fixture.
3. **Power On:** Turn on the power to the light fixture. The bulb will illuminate in its default soft white setting.

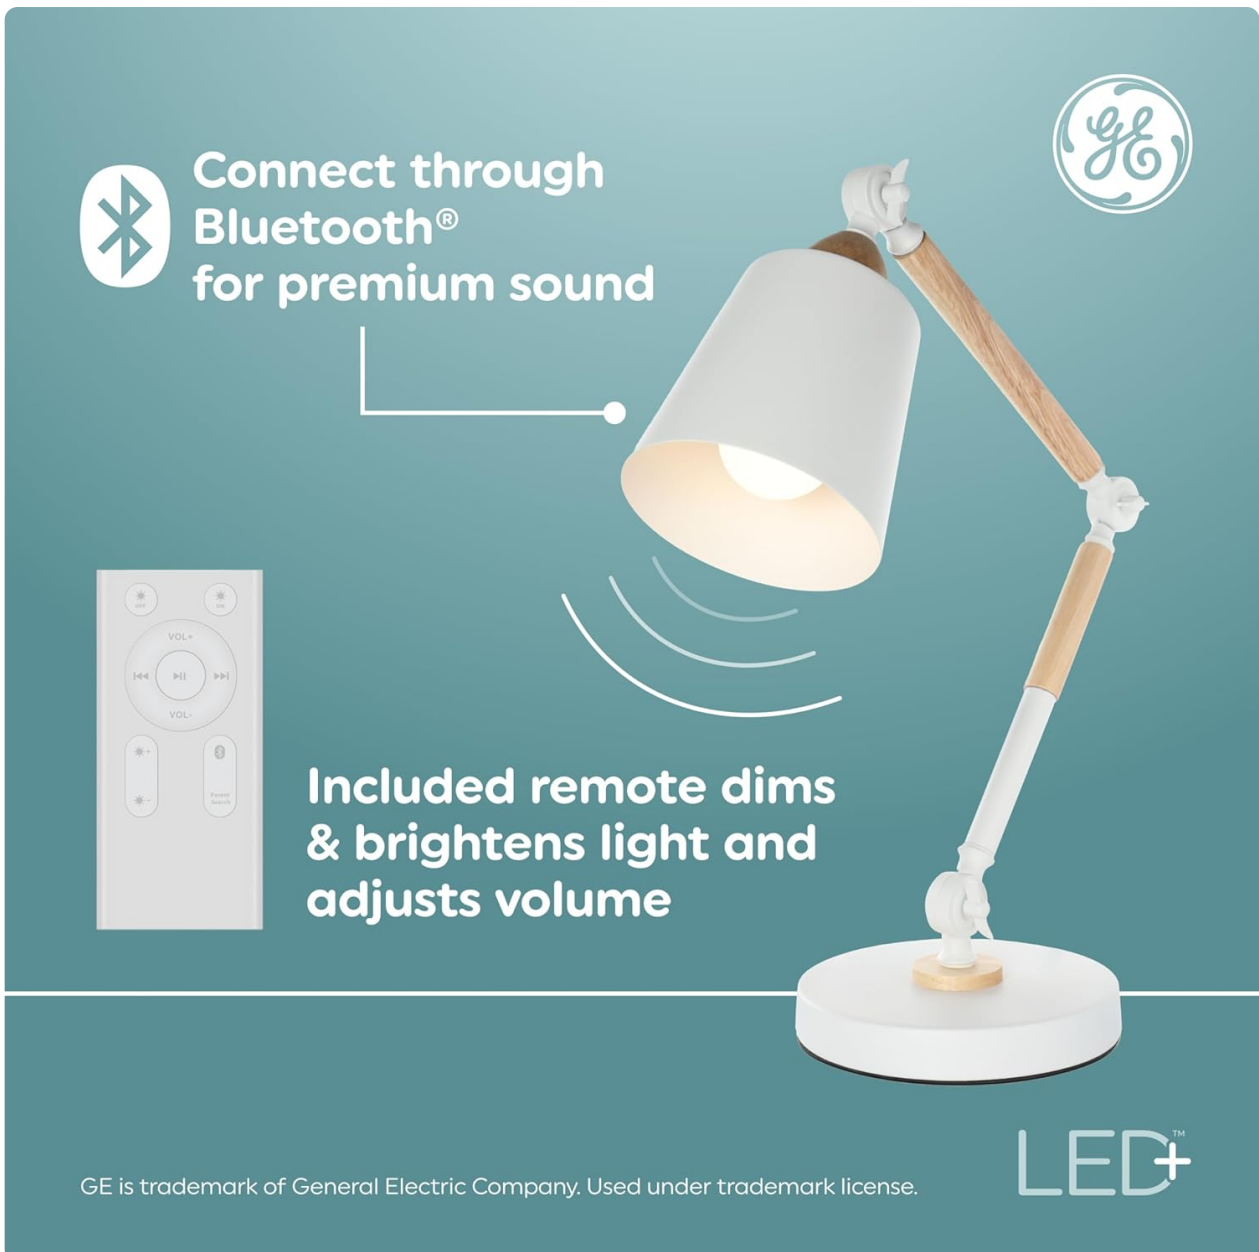

Figure 2: Installing the bulb into a lamp fixture.

## 5. BLUETOOTH CONNECTION

To stream audio, connect your smart device (smartphone, tablet) to the bulb via Bluetooth.

1. **Activate Bluetooth:** On your smart device, enable Bluetooth.
2. **Search for Device:** Look for "GE LED+ Speaker" in the list of available Bluetooth devices.
3. **Pair:** Select the device to pair. Once connected, you can play audio through the bulb's speaker.

Your browser does not support the video tag. This video demonstrates how to connect the GE LED+ Speaker bulb via Bluetooth and sync multiple bulbs for enhanced sound. It shows a hand screwing in a bulb, turning on a lamp, and a smartphone connecting via Bluetooth to play music. It also illustrates adding more bulbs to create a multi-speaker setup.

## 6. REMOTE CONTROL OPERATION

The included wireless remote provides full control over both lighting and audio functions.

**Connect through Bluetooth® for premium sound**

**Included remote dims & brightens light and adjusts volume**

GE is trademark of General Electric Company. Used under trademark license.

**LED+**

## Light Control:

- **On/Off:** Press the power button to turn the light on or off.
- **Dimming:** Use the sun icons (small sun for dim, large sun for bright) to adjust light intensity.
- **Color Change:** Select from 8 preset colors or soft white using the color buttons.
- **Smooth Fade:** Press the 'Smooth Fade' button to cycle through colors with a gradual transition.

## Audio Control:

- **Play/Pause:** Use the play/pause button to control audio playback.
- **Volume:** Adjust the volume using the volume up (+) and volume down (-) buttons.
- **Skip Tracks:** Use the skip forward and skip backward buttons to navigate audio tracks.
- **Bluetooth On/Off:** Press the Bluetooth button to enable or disable the speaker function.

## Special Modes:

- **Party Mode:** Press the 'Party Mode' button to synchronize light color changes with the rhythm of the music being played.

## 7. MULTI-BULB SYNCHRONIZATION

---

For an enhanced audio experience, you can connect up to 10 GE LED+ speaker bulbs to create a surround sound effect.

1. **Install Additional Bulbs:** Install additional GE LED+ speaker bulbs in fixtures within 25 feet of the primary (parent) bulb.
2. **Power On:** Turn on all installed bulbs. They will automatically attempt to sync with the parent bulb.
3. **Remote Control:** Use the remote control to manage all synced bulbs simultaneously. The remote allows assigning bulbs to left or right channels for stereo sound.

## 9. TROUBLESHOOTING

---

Problem	Possible Solution
Bulb not lighting up.	Ensure the bulb is screwed in correctly and the light fixture has power. Check the remote control battery.
Bluetooth speaker not connecting.	Ensure Bluetooth is enabled on your smart device and the bulb is within range. Try restarting the bulb (turn off/on power) and your device's Bluetooth.
Remote control not working.	Check the remote control battery. Ensure there are no obstructions between the remote and the bulb. The remote uses infrared (IR) and requires a direct line of sight.
Multiple bulbs not syncing.	Ensure all bulbs are within 25 feet of the parent bulb. Turn all bulbs off and then on again to re-initiate the sync process.
Sound quality is poor.	Ensure the bulb is not in a totally enclosed luminaire, which can affect sound. Adjust volume on both your device and the remote.

## 10. CARE AND MAINTENANCE

---

- **Cleaning:** Disconnect power before cleaning. Wipe the bulb with a soft, dry cloth. Do not use liquid cleaners.
- **Remote Battery:** The remote control uses a lithium button/coin cell battery. Replace when the remote's functionality diminishes. Refer to the quick start guide for battery replacement instructions.
- **Storage:** Store the bulb in a cool, dry place when not in use for extended periods.

## 11. WARRANTY INFORMATION

---

This GE LED+ A21 Smart LED Speaker Light Bulb comes with a **3-year limited warranty** from the date of purchase. For warranty claims or further support, please contact GE Lighting customer service.
