SETUP INSTRUCTIONS

1. **Connect the Keyboard:** Plug the USB-A connector of the keyboard into an available USB port on your computer or gaming console. The keyboard is plug-and-play, and your system should automatically detect it.
2. **Driver Installation (Optional for advanced features):** For full customization of RGB lighting and programmable keys, download and install the official Hawksbill software/drivers from the manufacturer's website.
3. **Adjust Keyboard Position:** Utilize the adjustable feet on the underside of the keyboard to set your preferred typing angle for comfort during extended use.

NO LAG

Wired keyboard ensures zero lag time with a direct connection to your device with standard USB connection

Video: Unboxing and Initial Setup

Your browser does not support the video tag.

Video Description: This video demonstrates the unboxing of the keyboard, showing the included accessories, and the process of connecting it to a computer. It also briefly touches on the tactile feel of the keys and the initial illumination.

OPERATING INSTRUCTIONS

RGB Lighting Customization

The Scorpion V1 keyboard features a brilliant RGB display with over 16 million colors and more than 15 lighting modes. These can be customized through the dedicated software or by using specific key combinations on the keyboard itself.

- **Switching Modes:** Use the **Fn** key in combination with designated function keys (e.g., **Fn + Insert**) to cycle through

various animated lighting effects.

- **Adjusting Brightness/Speed:** Specific key combinations (refer to software or quick guide) allow adjustment of lighting brightness and animation speed.
- **Custom Profiles:** The software allows you to create and save custom lighting profiles, highlighting specific keys for different applications (e.g., gaming, editing).

RGB Color Modes

- 15+ RGB lighting modes
- 16 million brilliant RGB colors
- Fully customizable
- Quick swap from gaming to office

Multimedia Controls

The keyboard is equipped with dedicated multimedia controls and a multi-functional roller for convenient audio and video management.

- **Volume Roller:** Use the roller located on the top right of the keyboard to quickly adjust the system volume.
- **Media Playback Buttons:** Dedicated buttons allow you to play, pause, skip tracks, and mute audio instantly.

MULTIMEDIA CONTROLS

Dedicated media controls to play, pause and mute music and videos instantly.

Adjust volume, skip to the next song with the touch of a button. Includes multi-functional roller for quick adjustments.

Key Customization and Replacement

The mechanical switches are designed for durability and a tactile feel. The included keycap puller and replacement switches allow for easy customization or maintenance.

- **Removing Keycaps:** Use the keycap puller to gently grip and lift keycaps for cleaning or replacement.
- **Replacing Key Switches:** The keyboard supports hot-swappable switches. Use the switch puller (if included separately, or the keycap puller can sometimes assist) to carefully remove a switch and insert a new one. Ensure proper alignment before pressing down.
- **Custom Keycaps:** The red spacebar and escape keycaps can be installed for a personalized look.

Easy Key Removal

- Key removal tool included
- Quick replacement of all keys
- Ideal for cleaning

Image: A close-up view of the mechanical key switches, highlighting their design and the ability to replace them.

MAINTENANCE

Regular maintenance helps prolong the life and performance of your keyboard.

- **Cleaning Keycaps:** Use the included keycap puller to remove keycaps. Clean them with a soft, damp cloth and mild soap if necessary. Ensure they are completely dry before reattaching.
- **Cleaning the Keyboard Base:** Use compressed air to remove dust and debris from between the keys. Wipe the surface with a soft, dry cloth.
- **Cable Management:** Avoid sharp bends or excessive pulling on the USB cable to prevent damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Keyboard not responding	Loose USB connection, faulty USB port, driver issue.	Ensure USB cable is securely plugged in. Try a different USB port. Reinstall keyboard drivers.
RGB lighting not working or incorrect	Software settings, incorrect key combination, power issue.	Check lighting settings in the Hawksbill software. Try cycling through modes using Fn + Insert . Ensure keyboard is receiving sufficient power.
Keys not registering or ghosting	Debris under keycap, faulty switch, software conflict.	Remove keycap and clean. Replace faulty key switch if necessary. Ensure anti-ghosting is enabled (if applicable via software).
