4.2 App Installation and Account Setup

1. Download the 'CloudEdge' app from the App Store (iOS) or Google Play Store (Android).
2. Open the app and register a new account, then log in.

4.3 Camera Pairing

1. Power on the camera. The indicator light will flash red, indicating it's ready for pairing.
2. In the CloudEdge app, tap '+' to add a new device.

3. Follow the on-screen instructions to connect the camera to your 2.4GHz Wi-Fi network. Ensure your phone is connected to the same Wi-Fi network.
4. Scan the QR code displayed on your phone with the camera lens. You will hear a confirmation sound when successful.
5. Name your camera and complete the setup process.

4.4 Mounting the Camera

Choose a suitable outdoor location with good Wi-Fi signal and a clear view of the area you wish to monitor. Use the provided mounting bracket, screws, and wall plugs to securely attach the camera to a wall or ceiling.

5. OPERATING YOUR CAMERA

5.1 Live View and Pan/Tilt Control

Open the CloudEdge app and select your camera to access the live view. Use the on-screen joystick or directional arrows to control the camera's pan (355°) and tilt (120°) movements, allowing you to remotely adjust the viewing angle.

Tips

Your received an alarm message from Backyard

This image depicts the camera's smart detection features in action. It shows a person detected by the camera at night, triggering a spotlight, an audible siren, and an alarm message notification on a smartphone, illustrating its multi-layered security response to potential threats.

This diagram illustrates the camera's adjustable motion detection sensitivity, allowing users to define specific detection zones and levels. This feature helps minimize false alarms by focusing detection on critical areas.

5.4 Night Vision

The camera is equipped with IR-CUT technology and infrared lights, automatically switching to night vision mode in low-light conditions. This ensures clear video capture even in complete darkness, with a night vision range of up to 20 meters.

6. MAINTENANCE

6.1 Battery Management

The camera's 15000mAh battery can last up to 100 days on a single charge, depending on usage and motion detection frequency. For continuous power, connect the camera to a compatible solar panel (sold separately or included in some packages). Monitor battery levels via the CloudEdge app and recharge as needed.

6.2 Weather Protection

The camera has an IP67 waterproof rating, ensuring it is protected against dust and water immersion. It is designed to operate reliably in outdoor environments with temperatures ranging from -20°C to 60°C. Regularly check for any debris or blockages around the lens and clean gently with a soft, dry cloth if necessary.

The camera is shown enduring outdoor elements, specifically rain, highlighting its IP67 waterproof and dustproof rating. This indicates the camera's robust design, capable of withstanding harsh weather conditions and operating reliably in temperatures ranging from -20°C to 60°C.

7. TROUBLESHOOTING

- **Camera not connecting to Wi-Fi:** Ensure your Wi-Fi is 2.4GHz. Check Wi-Fi signal strength at the camera's location. Reset the camera and try pairing again.
- **Poor image quality:** Ensure the lens is clean. Check for obstructions. Verify the camera is within optimal Wi-Fi range.

- **Motion detection issues:** Adjust motion sensitivity settings in the app. Ensure detection zones are correctly configured. Avoid placing the camera where frequent non-human motion (e.g., tree branches) might trigger false alarms.
- **Battery not charging:** Ensure the USB cable is securely connected to both the camera and the power adapter/solar panel. Check if the power adapter is working correctly.
- **No audio:** Check volume settings on your phone and in the app. Ensure the camera's microphone and speaker are not obstructed.
