SETUP

Unfolding the Table

1. Place the folded laptop table on a flat, stable surface with the underside facing up.
2. Gently pull each leg outwards from the main table body until it locks into its fully extended position. Ensure both legs are fully extended and stable before use.

Positioning the Table

Once unfolded, place the table on a flat, level surface. For optimal stability, ensure all four rubber-padded feet are firmly in contact with the surface. Avoid placing the table on uneven or soft surfaces that may compromise its balance.

OPERATING INSTRUCTIONS

Using the Laptop Surface

Place your laptop directly onto the main surface of the table. The engineered wood surface is designed to support the weight of most laptops. There is ample space to also place an external mouse or a notebook beside your laptop.

Utilizing the Tablet Groove

The integrated groove at the top of the table is designed to hold your tablet, smartphone, or e-reader upright. Simply slide your device into the groove for hands-free viewing.

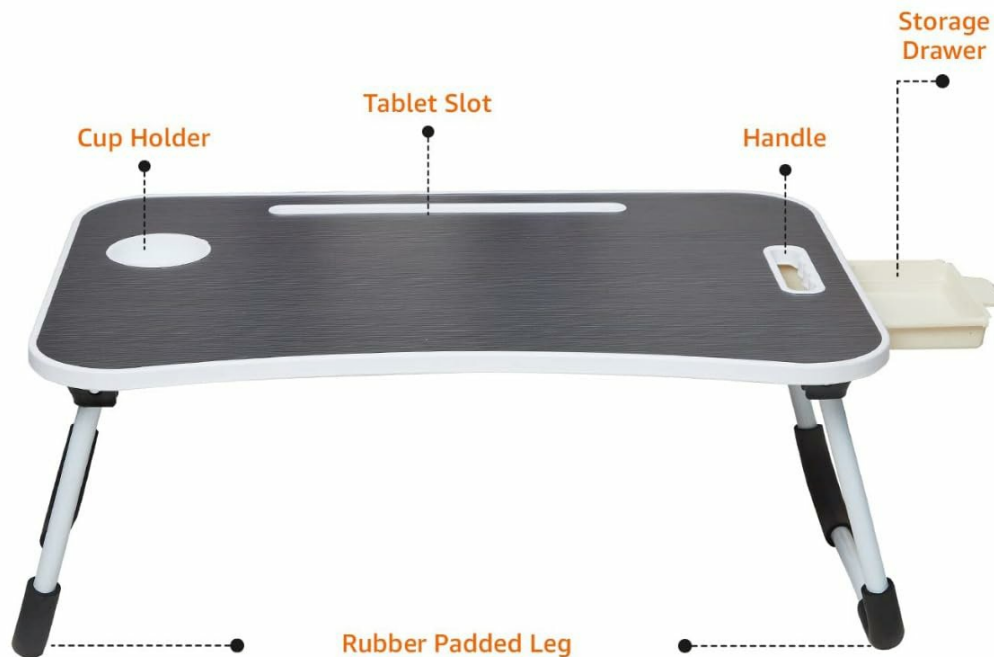

Using the Cup Holder

The circular indentation on the table serves as a cup holder. Place your beverage cup securely in this holder to minimize the risk of spills and protect your electronic devices.

Accessing the Mini Drawer

The small drawer located on the side of the table can be pulled out to store small items such as pens, USB drives, charging cables, or other day-to-day accessories. Push it back in to secure its contents.

MAINTENANCE

Cleaning

To clean the table surface, wipe it with a soft, damp cloth. For stubborn marks, a mild soap solution can be used, followed by wiping with a clean, dry cloth. Avoid using abrasive cleaners or harsh chemicals, as these may damage the engineered wood or plastic edges.

Storage

To store the table, gently press the release mechanism (if any) or simply fold the legs inwards until they are flat against the underside of the table. Store in a dry place away from direct sunlight or

extreme temperatures to preserve the material integrity.

TROUBLESHOOTING

Stability Issues

If the table feels unstable, ensure that all four legs are fully extended and locked into place. Verify that the table is placed on a flat, firm surface. Uneven surfaces, such as soft bedding or thick carpets, may affect stability.

Folding/Unfolding Difficulties

If the legs are stiff or difficult to fold/unfold, check for any obstructions. Apply gentle, even pressure when extending or retracting the legs. Avoid forcing the mechanism.
