Denfany KD2328A

DENFANY 2-in-1 Hair and Face Steamer

MODEL: KD2328A

Introduction

The DENFANY 2-in-1 Hair and Face Steamer (Model KD2328A) is a versatile personal care device designed for both hair and facial treatments, and can also function as a humidifier. It features an ultra-fine mist with UV ozone for enhanced benefits. This manual provides essential information for safe and effective operation, setup, maintenance, and troubleshooting.

Safety Information

This device is equipped with an intelligent safety warning system. It will emit a beeping sound when the water supply is running low and will automatically shut off if there is no water in the tank. Always ensure the device is placed on a stable, flat surface away from edges. Do not immerse the unit in water. Keep out of reach of children. Use only clean, distilled water to prevent mineral buildup and ensure optimal performance.

Product Components

The DENFANY 2-in-1 Hair and Face Steamer includes the main unit, a hair steaming dome attachment, and a facial steaming arm. It also comes with accessories for cleaning and use.

Salon Level Nursing Soft and Shiny Hair

Setup Instructions

1. **Unpack:** Carefully remove all components from the packaging.
2. **Assemble:** Ensure the device is properly assembled. For hair steaming, attach the dome. For facial steaming, attach the adjustable arm.
3. **Fill Water Tank:** Fill the water tank with clean, distilled water up to the maximum level indicated. Do not overfill.
4. **Placement:** Place the steamer on a stable, heat-resistant surface.
5. **Connect Power:** Plug the device into a suitable power outlet.

Operating Instructions

For Hair Steaming:

1. After washing and conditioning your hair, sit comfortably with your head positioned under the steaming dome.
2. Turn on the device using the 'Steam' button.
3. Adjust the dome as needed to ensure even steam distribution over your hair.
4. Steam for 10-20 minutes.
5. After steaming, turn off the device and allow your hair to cool before styling.

SALON CARE AT HOME

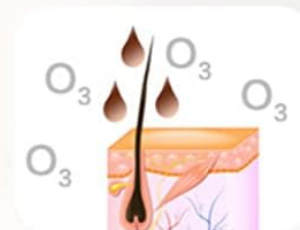

Moisturizing hair roots and protecting hair cores

Hair steaming opens up hair cuticles and promotes nutrient absorption

Ionic oil treatment strengthens hair roots and hairlines for shiny and silky hair

Ozone ions speeds up perming and coloring

Figure 5: The 2-in-1 Hair & Facial Steamer used for hair conditioning.

For Facial Steaming:

1. Ensure the facial steaming arm is attached.
2. Cleanse your face thoroughly before steaming.
3. Turn on the device using the 'Steam' button. You may also activate the 'Ozone' function for deeper cleansing.
4. Position your face 6-8 inches away from the nozzle. Avoid direct contact with the steam.
5. Steam for 10-15 minutes.
6. After steaming, turn off the device and follow with your regular skincare routine.

Aromatherapy Function:

For an enhanced experience, place a few drops of your favorite essential oil on the aromatherapy cotton pad (if included) and insert it into the designated slot on the nozzle.

Fragrance Function Design

Place a few drops of your favorite essential oil on the aromatherapy cotton pad. You will have the great apparatus of aromatherapy.

Figure 10: Using the fragrance function with essential oils.

Maintenance

1. **Cleaning:** After each use, turn off and unplug the device. Allow it to cool completely. Empty any remaining water from the tank. Wipe the interior and exterior surfaces with a soft, damp cloth.
2. **Descaling:** To prevent mineral buildup, especially if using tap water (though distilled water is recommended), descale the unit periodically. Mix a solution of equal parts white vinegar and water, fill the tank, and run the steamer for a few minutes. Then, empty and rinse thoroughly with clean water.
3. **Storage:** Store the steamer in a cool, dry place away from direct sunlight and moisture.

Troubleshooting

- **No Steam:** Ensure the water tank is filled to the correct level and the device is properly plugged in and turned on. Check for any blockages in the nozzle.

- **Device Shuts Off:** This is likely due to low water levels. Refill the water tank. The safety system automatically turns off the device when water is low.
- **Unusual Odor:** If a new plastic smell is present during initial uses, it is normal. If the odor persists or is unusual, clean the water tank and components thoroughly.
- **Water Leakage:** Ensure all components are correctly assembled and tightened. Check the water tank for cracks or damage.

Specifications

Feature	Detail
