INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your AINAVI 10.2-inch Android 12 Car Stereo. This unit is designed to upgrade the infotainment system in Chevrolet Silverado and GMC Sierra models from 2014 to 2018, offering advanced features such as Android 12, QLED touch screen, CarPlay, Android Auto, GPS navigation, and more. Please read this manual thoroughly before installation and use to ensure proper function and safety.

IMPORTANT REMINDERS BEFORE INSTALLATION

Before proceeding with the installation of your AINAVI car stereo, please observe the following critical points:

- **Optical Fiber Output:** This car stereo does **not** support vehicles equipped with an optical fiber audio output system.
- **Power Cable Interface:** Installation is **not** supported if your car's power cord interface has only two cables. Please verify your vehicle's wiring harness before attempting installation.

SETUP

1. Unpacking and Component Check

Carefully unpack all components and verify against the packing list:

- Car Head Unit with Frame (1280*720) for Chevrolet Silverado GMC Sierra 2014-2018
- User Manual
- Power Cable
- AHD 1080P Rear View Camera
- Microphone
- Blue Tool (for trim removal)
- GPS Module
- USB Cables (4Pin & 6Pin)
- RCA Cable
- Reversing Control Cable

How to reach us for installation & technical support?

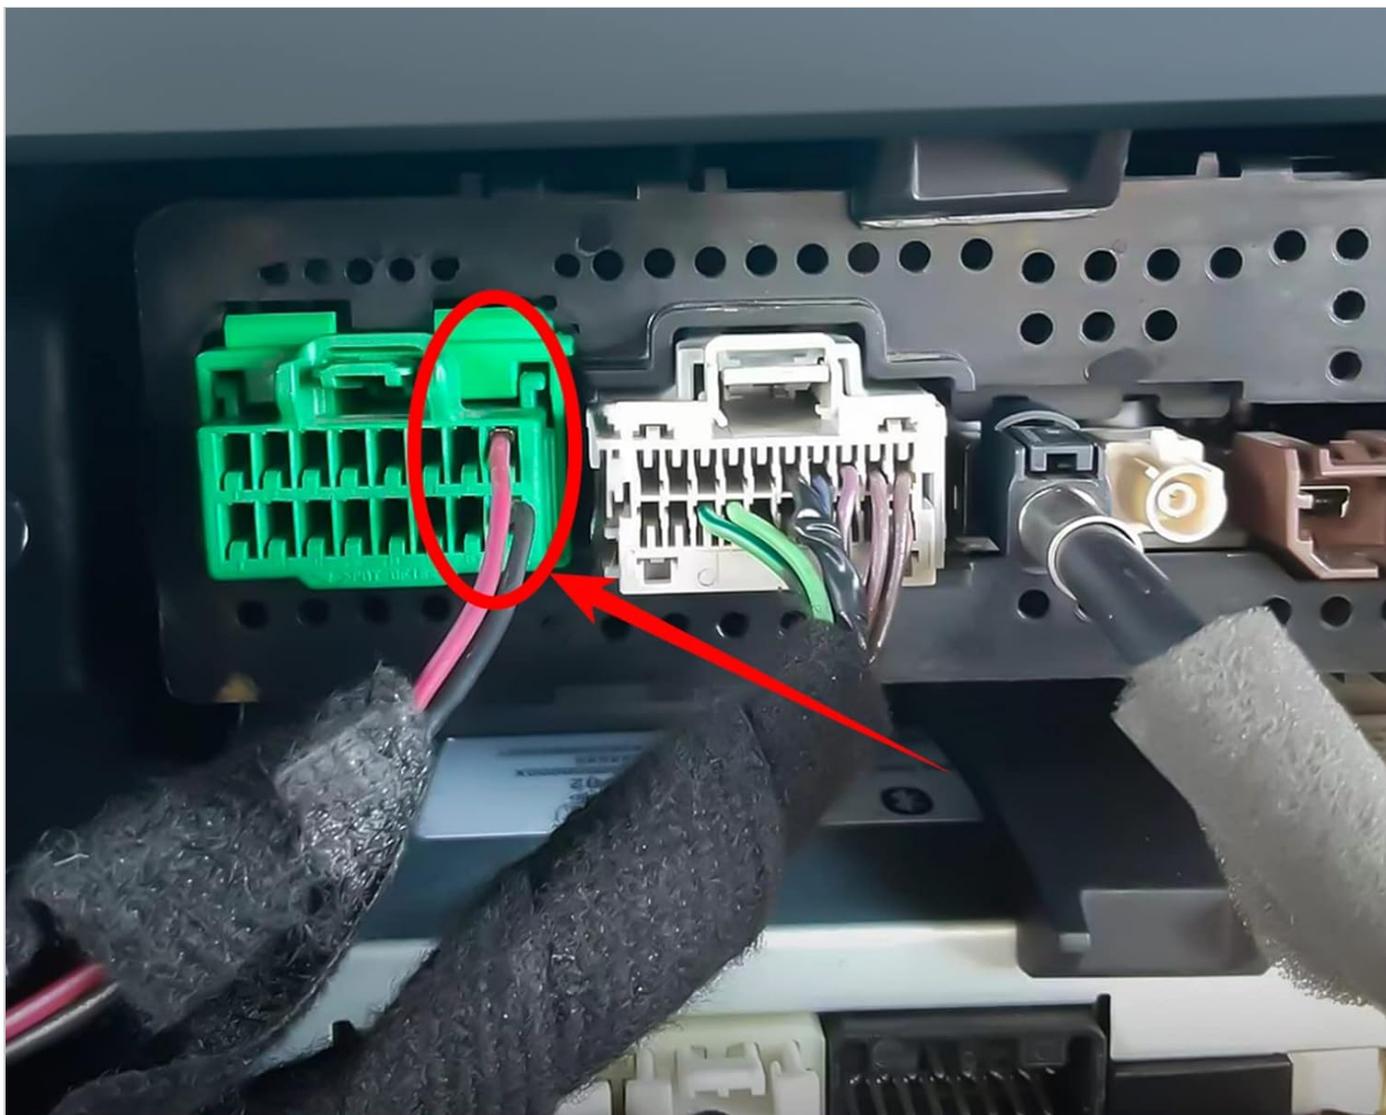

The screenshot shows an Amazon product page for 'HomeCar'. The page is divided into two main sections: 'STEP 1' and 'STEP 2'. In 'STEP 1', the product is 'In Stock' and the seller is 'HomeCar', which is highlighted with a red box. A blue hand icon points to the 'HomeCar' text. In 'STEP 2', there is a 'Have a question for HomeCar?' section with an 'Ask a question' button, also highlighted with a red box and a blue hand icon. Below the screenshot, three steps are listed:

- Step 1** Click "HomeCar"
- Step 2** Click "Ask a question"
- Step 3** Please send us pictures or videos of the technical or installation questions you met. Then we will get back to you as soon as possible.

Image: Diagram of included components. This image visually lists all items included in the product package, such as the head unit, frame, cables, and accessories.

2. Physical Installation

Installation typically involves removing the factory radio, connecting the new head unit's wiring harness to the vehicle's existing harness, installing the GPS antenna, microphone, and rear view camera (if applicable), and then securing the new head unit and frame. Professional installation is recommended if you are unfamiliar with car audio wiring.

Note:

1. It was not supported if your car with optical fiber output.
2. It is not supported if the power cord interface with only two cables.

Image: AINAVI 10.2-inch Android 12 Car Stereo installed in a vehicle dashboard. This image shows the car stereo seamlessly integrated into the vehicle's interior, providing a visual of the final installed product.

3. Initial Power-On

After installation, turn on your vehicle's ignition. The stereo should power on automatically. Follow any on-screen prompts for initial setup, such as language selection and time zone.

OPERATING INSTRUCTIONS

1. User Interface Overview

The unit runs on Android 12, providing a familiar and intuitive interface. Navigate through apps and settings using the QLED touch screen. The 8-core processor ensures smooth operation.

Image: Android 12 system interface. This image displays the main screen of the Android 12 system, highlighting its app layout, Wi-Fi, QLED screen, themes, and Bluetooth 5.0 capabilities.

2. Navigation

The stereo supports various satellite services and comes with Google Maps pre-installed. You can use 2D and 3D perspectives, and access real-time traffic information. Voice control is also available for navigation commands.

Your browser does not support the video tag. Please update your browser to view this content.

Video: Shows the connection process for Apple CarPlay and Android Auto, along with setting up shortcut keys for quick access to functions.

4. Audio Features (DSP & EQ)

Utilize the professional DSP (Digital Signal Processor) with 48-EQ to fine-tune your audio experience. Adjust sound points, bass, surround sound, and bass filters to match your preferences. Presets like Normal, Jazz, Pop, Classical, Heavy Metal, Vocal, and Soft are available.

Intelligent Tone Adjustment System

Professional version of DSP(built in 48-EQ), the sound point can be controlled at any time.

Video: Demonstrates the split-screen functionality, allowing two applications to run side-by-side on the display.

7. Customization

Personalize your stereo with various themes and boot logo options. The 7-color button lights can be changed constantly or set to a specific color.

The advertisement features a dark blue vertical bar on the left side containing seven colored circles (cyan, white, red, yellow, green, magenta) and a 'Color Keylight' label. The main content area has a white background with the title 'Mobile Phone Mirroring (Tlink)' in blue and red. Below the title are two blue buttons: 'For iPhone Airplay' and 'For Android'. The central image shows a tablet and a smartphone displaying a colorful abstract wallpaper. At the bottom, a '720P' logo is followed by the text 'Ultra High Definition: 1280*720'.

Video: Shows the connection process for Apple CarPlay and Android Auto, along with setting up shortcut keys for quick access to functions.

9. Rear View Camera

The included AHD 1080P rear view camera provides clear reversing scenes. When the car is in reverse gear, the display automatically shows the real-time picture behind the car, complete with an astern ruler line for parking assistance. If your car supports astern trajectory, it will also be displayed.

AHD 1080P Rear Camera

When the car is in R gear, it will automatically display the real-time picture behind the car, and the reversing assistance is safer.

Image: AHD 1080P Rear Camera view. This image shows the clear display from the rear view camera, including parking guidelines and icons for high definition, night vision, wide angle, and waterproof features.

10. USB to RCA Output

The USB to RCA output function allows you to connect external headrest monitors, providing independent video playback for backseat passengers. This feature requires a separate headrest monitor (ASIN: B0CCV2GC25).

MAINTENANCE

1. Cleaning the Screen

Use a soft, lint-free cloth to gently wipe the QLED touch screen. For stubborn smudges, lightly dampen the cloth with water or a screen-safe cleaner. Avoid abrasive materials or harsh chemicals.

2. Software Updates

Periodically check for system updates to ensure optimal performance and access to the latest features. Updates can typically be found within the system settings under 'About device' or 'System updates'. Ensure a stable internet connection

during updates.

3. General Care

Avoid exposing the unit to extreme temperatures or direct sunlight for prolonged periods. Ensure all cables are securely connected to prevent intermittent issues. If the unit is not functioning correctly, refer to the troubleshooting section before attempting any repairs.

TROUBLESHOOTING

If you encounter issues with your AINAVI car stereo, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on.	Incorrect wiring, blown fuse, power supply issue.	Check all power connections. Verify vehicle fuses. Ensure the power cable interface is compatible (not two-cable only).
No sound or distorted audio.	Speaker wiring issues, incorrect audio settings, optical fiber output incompatibility.	Verify speaker connections. Adjust EQ and DSP settings. Confirm your vehicle does not use optical fiber audio output.
CarPlay/Android Auto not connecting.	Incorrect USB cable, Bluetooth pairing issue, software glitch.	Use a high-quality USB cable. Ensure Bluetooth is enabled and paired correctly. Restart both the stereo and your phone.
GPS not accurate or not working.	GPS antenna not properly installed or obstructed.	Ensure the GPS antenna is securely connected and placed in an unobstructed location (e.g., dashboard).
Rear view camera not displaying.	Camera wiring issue, incorrect settings.	Check the camera's power and video signal connections. Verify the reversing control cable is correctly wired.
Unit freezes or lags.	Too many apps running, low memory, software issue.	Close unnecessary applications. Clear cache. Perform a system reboot. If persistent, consider a factory reset (backup data first).

If these solutions do not resolve the issue, please contact AINAVI technical support for further assistance.
