4. SETUP INSTRUCTIONS

4.1 Assembling the Stand

1. Carefully remove the monitor and stand components from the packaging.
2. Attach the stand neck to the monitor panel using the provided screws.
3. Secure the stand base to the stand neck.
4. Place the assembled monitor on a stable, flat surface.

4.2 Connecting Cables

Ensure the monitor and all connected devices are powered off before making any connections.

- **Power:** Connect the power adapter to the monitor's power input, then plug the power cable into a wall outlet.
- **Video Input:** Connect either the DisplayPort (DP) cable or the HDMI cable from your computer/gaming console to the corresponding port on the monitor. For optimal performance (165Hz refresh rate, FreeSync), DisplayPort is recommended.
- **USB:** Connect the USB cable from your computer to the monitor's USB port for additional connectivity.
- **Audio:** If desired, connect external speakers or headphones to the Audio Out port.

4.3 Initial Power-On

1. Press the power button on the monitor to turn it on.
2. If no image appears, ensure all cables are securely connected and the correct input source is selected (see Operating Instructions).

5. OPERATING INSTRUCTIONS

5.1 On-Screen Display (OSD) Menu

The monitor features a joystick-style button (often referred to as a 'diffuse button') located on the back or bottom of the monitor for navigating the OSD menu. Press the button to activate the OSD, then move it up,

down, left, or right to select and adjust settings.

5.2 Common Settings

- **Input Source:** Select between HDMI and DisplayPort inputs.
- **Brightness/Contrast:** Adjust display luminance and contrast levels.
- **Color Settings:** Modify color temperature, gamma, and individual RGB values.
- **Picture Mode:** Choose from preset modes (e.g., Standard, Game, Movie, Text).
- **Refresh Rate:** Ensure your operating system and graphics card settings are configured to utilize the monitor's 165Hz refresh rate.
- **FreeSync:** Enable or disable FreeSync for adaptive synchronization with compatible graphics cards.
- **Blue Light Filter:** Adjust the blue light reduction level to reduce eye strain.

6. MAINTENANCE

To ensure the longevity and optimal performance of your monitor, follow these maintenance guidelines:

- **Cleaning the Screen:** Use a soft, lint-free cloth lightly dampened with water or a specialized screen cleaner. Avoid harsh chemicals, abrasive materials, or direct spraying onto the screen.
- **Cleaning the Casing:** Wipe the monitor casing with a soft, dry cloth.
- **Ventilation:** Ensure the monitor's ventilation openings are not blocked to prevent overheating.
- **Storage:** When not in use for extended periods, store the monitor in a cool, dry place, preferably in its original packaging.

7. TROUBLESHOOTING

If you encounter issues with your monitor, refer to the following common problems and solutions:

No Image or "No Signal" Message:

- Ensure the power cable is securely connected to the monitor and a working power outlet.
- Verify that the video cable (HDMI or DisplayPort) is firmly connected to both the monitor and your computer/device.
- Check if the correct input source is selected in the monitor's OSD menu.
- Test with a different video cable or port if available.
- Ensure your computer/device is powered on and not in sleep mode.

Flickering or Distorted Image:

- Check the video cable connections.
- Adjust the refresh rate in your computer's display settings to match the monitor's capabilities (165Hz).
- Enable or disable FreeSync in the OSD menu and your graphics card settings to see if it resolves the issue.
- Update your graphics card drivers.

Buttons Not Responding / OSD Menu Issues:

- Ensure the monitor is powered on.
- Press the joystick button firmly to activate the OSD.
- If the issue persists, power cycle the monitor by unplugging it for a few minutes and then plugging it back

in.
