

TeckNet EWM01005BA01

TeckNet Silent Wireless Mouse EWM01005BA01 Instruction Manual

INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your TeckNet Silent Wireless Mouse EWM01005BA01. Please read this guide thoroughly to ensure optimal performance and longevity of your device.

PACKAGE CONTENTS

- 1 x TeckNet Silent Wireless Mouse
- 1 x Nano USB Receiver

Note: The Nano USB Receiver is typically stored within the battery compartment of the mouse for safe keeping.

PRODUCT FEATURES

- **Silent Click Technology:** Reduces click noise by over 90% for a quiet working environment.
- **Adjustable DPI:** 6 adjustable DPI levels (800/1200/1600/2400/3200/4000) for precise cursor control on various surfaces.
- **2.4GHz Wireless Technology:** Provides a stable and reliable connection with fast data transfer, up to 15 meters range, even in high Wi-Fi traffic environments.
- **Plug & Play:** No software installation required; simply plug in the nano receiver and start using.
- **Ergonomic Design:** Streamlined shape with soft rubber sides for comfortable use during extended periods.
- **Long Battery Life:** Up to 24 months of battery life with low-power chips and smart sleep technology (1 AA battery not included).
- **Co-Link Technology:** Automatic pairing with the nano receiver, ensuring a stable connection even if temporarily lost.

SETUP GUIDE

1. **Install Battery:** Open the battery compartment cover located on the underside of the mouse. Insert one AA battery (not included), ensuring correct polarity (+/-). Close the battery compartment cover.
2. **Connect Nano Receiver:** Locate the Nano USB Receiver, usually stored inside the battery compartment. Plug the Nano USB Receiver into an available USB port on your computer (PC, Mac, or Laptop).

**2.4 Ghz Wireless
Transmission Technology**

Wireless rang can be up to
15 meters without interference

Image: The TeckNet wireless mouse connected to a laptop via its Nano USB receiver, illustrating the 2.4GHz wireless transmission technology and an effective range of up to 15 meters without interference.

3. **Power On:** Turn on the mouse using the On/Off switch, typically located on the underside.
4. **Automatic Connection:** The mouse will automatically connect to your computer. No additional drivers or software are required.

OPERATING INSTRUCTIONS

Once connected, the TeckNet Silent Wireless Mouse functions like a standard mouse. Move the mouse to control the cursor on your screen. The left and right buttons perform standard click functions, and the scroll wheel allows for vertical scrolling.

DPI Adjustment

The mouse features a DPI adjustment button, usually located behind the scroll wheel. Press this button to cycle through the available DPI settings (800/1200/1600/2400/3200/4000). Each press changes the cursor speed, allowing you to select the sensitivity that best suits your task or preference.

Silent Operation

The silent click technology ensures a quiet user experience, ideal for environments where noise reduction is important.

NOISE REDUCTION 90%

No noise, full concentration

Image: The TeckNet wireless mouse highlighted with text indicating 'Noise Reduction 90%', accompanied by an image of a sleeping baby, emphasizing its quiet operation for undisturbed environments.

BATTERY INFORMATION

The TeckNet Silent Wireless Mouse requires one AA battery. With its energy-efficient design and smart sleep mode, the battery can last up to 24 months. Battery life may vary based on usage patterns and computing conditions.

- To replace the battery, open the battery compartment on the underside of the mouse.
- Insert a new AA battery, observing the correct polarity.
- Dispose of used batteries responsibly according to local regulations.

MAINTENANCE

- Keep the mouse clean by wiping it with a soft, dry cloth.
- Avoid exposing the mouse to extreme temperatures, direct sunlight, or liquids.
- Do not disassemble the mouse, as this may void the warranty.

TROUBLESHOOTING

Problem	Solution
Mouse not responding	<ul style="list-style-type: none">◦ Ensure the mouse is powered on.◦ Check if the battery is correctly installed and has sufficient charge. Replace if necessary.◦ Ensure the Nano USB Receiver is securely plugged into a working USB port. Try a different USB port.◦ Restart your computer.◦ If connection is lost, TeckNet Co-Link technology should re-pair automatically. If not, try unplugging and re-plugging the receiver.
Cursor movement is erratic or slow	<ul style="list-style-type: none">◦ Clean the optical sensor on the underside of the mouse.◦ Ensure you are using the mouse on a suitable surface. Avoid highly reflective or transparent surfaces.◦ Adjust the DPI setting using the DPI button to find a comfortable cursor speed.
Wireless range issues	<ul style="list-style-type: none">◦ Ensure there are no large metal objects or other wireless devices causing interference between the mouse and the receiver.◦ Move the mouse closer to the Nano USB Receiver.
