

AIYATO Smart Air Tracker Tag

AIYATO Smart Air Tracker Tag (4-Pack) Instruction Manual

Model: Smart Air Tracker Tag

Brand: AIYATO

1. INTRODUCTION AND OVERVIEW

The AIYATO Smart Air Tracker Tag is a compact, anti-lost device designed to help you locate your personal items using the Apple Find My network. This device is MFi certified, ensuring seamless integration with your iOS devices. It is ideal for tracking keys, wallets, luggage, backpacks, and even pets.

3. SETUP AND CONNECTION

Follow these steps to connect your AIYATO Smart Air Tracker Tag to your Apple Find My app:

1. **Power On:** Remove the protective film from the tag and long-press the button to power it on.
2. **Open Find My App:** On your iPhone or iPad, open the 'Find My' app. Ensure your iOS system is version 15.0 or later and Bluetooth is enabled.
3. **Add New Item:** Tap the 'Items' tab, then tap '+' and select 'Add Other Item'.
4. **Connect:** The app will search for nearby items. Once 'Wireless Locator' or 'iTag' appears, tap 'Connect'.
5. **Name and Emoji:** Name your tag (e.g., 'Keys', 'Wallet') and choose an emoji to represent it. Tap 'Continue'.
6. **Agree to Terms:** Review the privacy information and tap 'Agree'.
7. **Finish Setup:** Tap 'Finish' to complete the connection process.

4. OPERATING INSTRUCTIONS

Locating Items Nearby (Play Sound)

When your item is within Bluetooth range (approximately 30m/200ft), you can use the 'Play Sound' feature in the Find My app to make your tag emit an 80-90dB beep, helping you pinpoint its exact location.

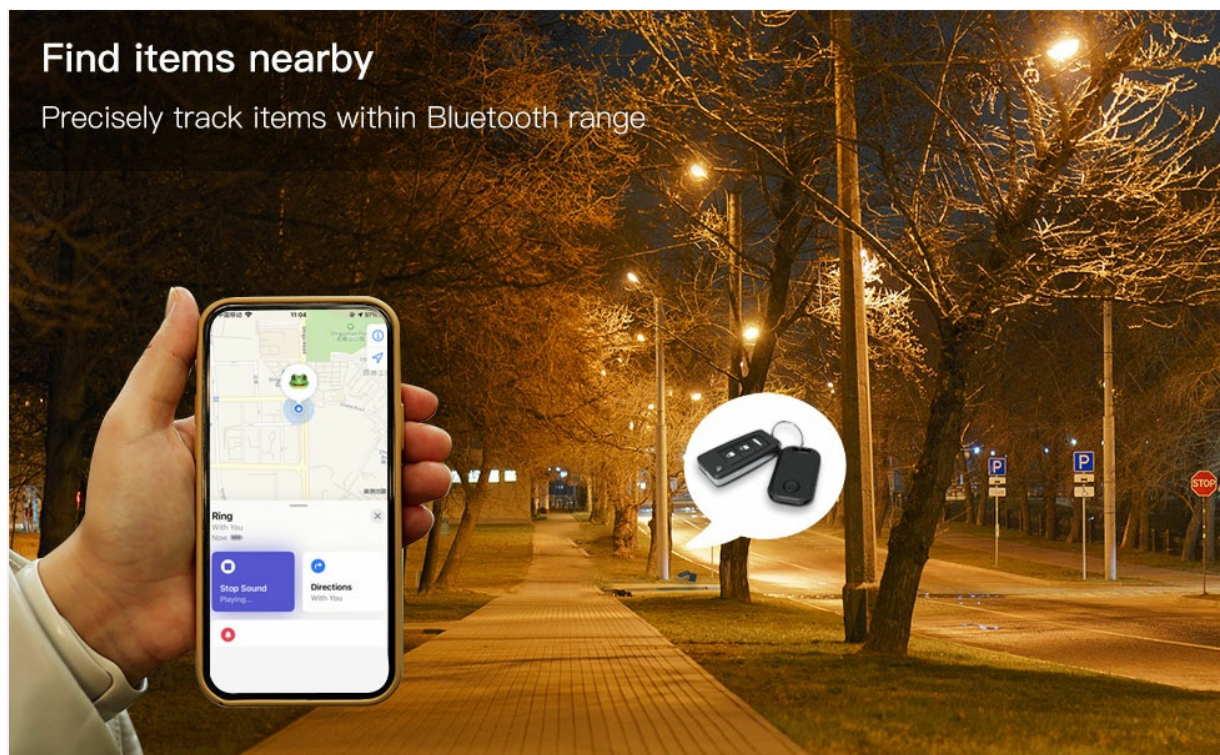

Image 4.1: The AIYATO Smart Air Tracker Tag attached to a wallet, with an iPhone displaying a 'beep beep' notification, illustrating the sound-based item location feature.

Locating Items Far Away (Find My Network)

If your item is out of Bluetooth range, the Apple Find My network leverages millions of Apple devices worldwide to anonymously detect your tag's location and update it on your map. You can then get directions to its last known location.

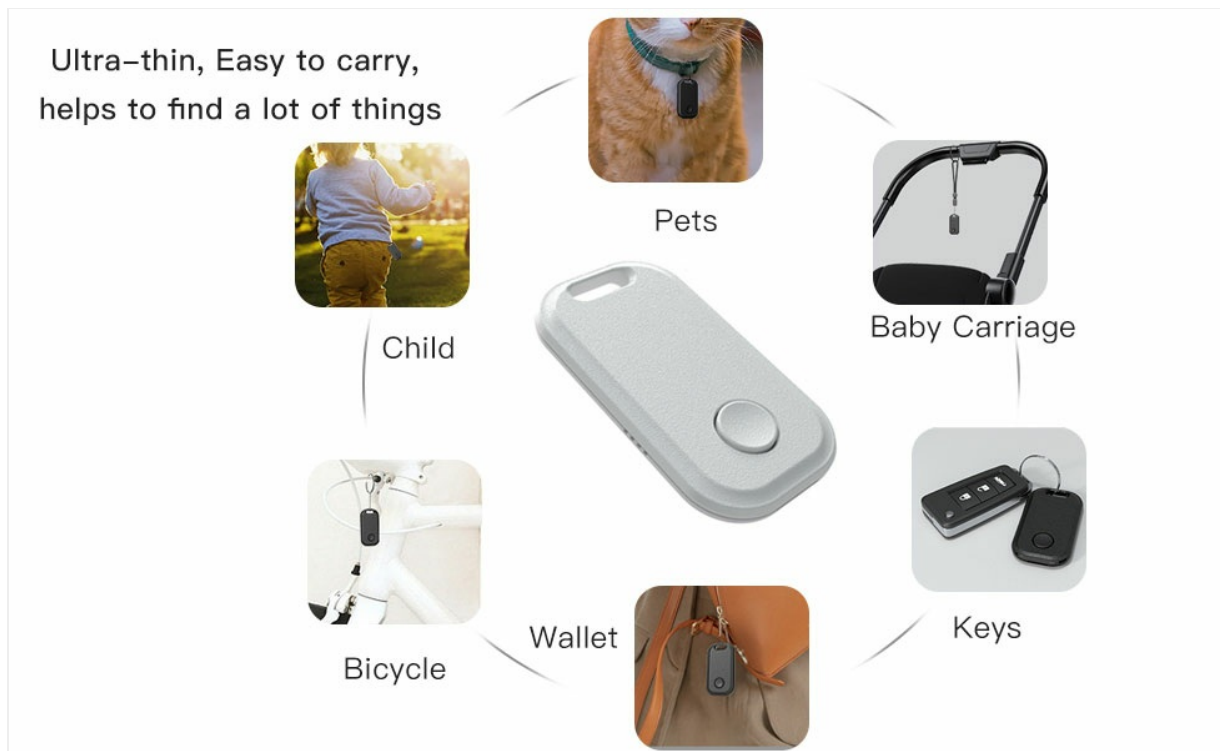

Image 4.2: An iPhone screen showing a map with the AIYATO Smart Air Tracker Tag's location, demonstrating its ability to track items even when far away using the Find My network.

Anti-Lost Alarm Function

Enable the Anti-Lost Alarm mode in the Find My app. Your iOS device will emit an alarm if it disconnects from your AIYATO tag, preventing you from leaving important items behind.

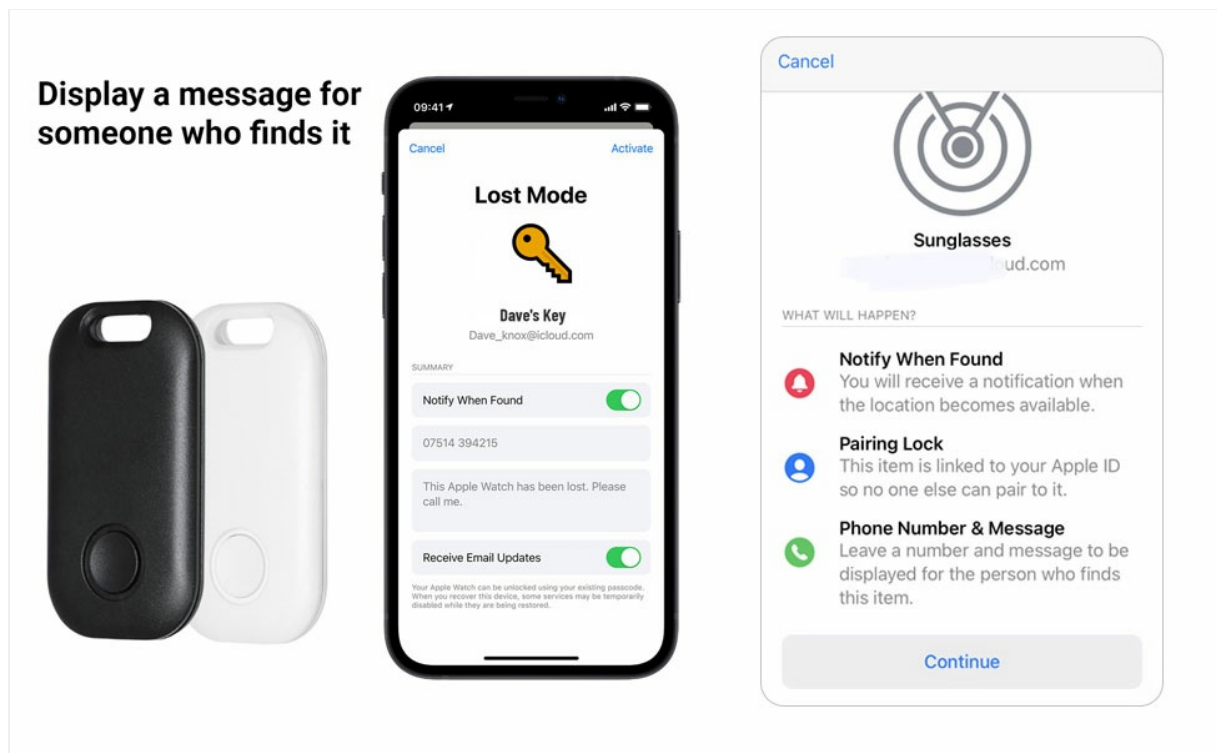

Image 4.3: An iPhone screen showing a 'Left Behind' notification for a car key, illustrating the anti-lost alarm feature that alerts users when they move away from their tagged item.

Lost Mode and Privacy Protection

If you lose your tag, you can enable 'Lost Mode' in the Find My app. This allows you to leave contact information. If someone finds your tag and scans it with an NFC-capable smartphone, they can access your contact details. All data is protected by Apple MFi security.

Sharing Items (iOS 17+)

With iOS 17 or later, you can share your item's location with friends or family, allowing multiple users to track the same tag.

5. MAINTENANCE

Battery Replacement

The AIYATO Smart Air Tracker Tag uses a replaceable CR2032 coin cell battery. The battery typically lasts up to 6 months to 2 years depending on usage. When the battery is depleted, you can easily replace it by opening the tag's casing.

6. SPECIFICATIONS

Feature	Detail
Brand	AIYATO
Model	Smart Air Tracker Tag
Compatible Devices	iPhone, iPad (iOS 15.0 or later)
Battery Type	CR2032 (Included, Replaceable)
Average Battery Life	Up to 2 years
Connectivity	Bluetooth 5.2
Buzzer Volume	80-90dB
Item Weight	2.89 ounces
Material	Acrylonitrile Butadiene Styrene (ABS)

7. TROUBLESHOOTING

Unable to Connect or Pair

- Ensure your iOS device has Bluetooth enabled and is running iOS 15.0 or later.
- Make sure the tag's battery is properly installed and has sufficient charge.
- Bring the tag close to your iOS device during the pairing process.
- **Resetting the Device:** If connection issues persist, you may need to reset the device. Remove and reinsert the battery five times. After the fifth reinsertion, you should hear a different tone, indicating the battery is resetting and ready to pair with a new device. Then, attempt to reconnect via the Find My app.

Your browser does not support the video tag.

Video 7.1: An official YuanChance video demonstrating how to reset the AIYATO Smart Air Tracker Tag by repeatedly removing and reinserting the battery, and then attempting to reconnect it to the Find My app.

Sound is Not Loud Enough

- The tag's buzzer is designed to be audible in quiet to moderately noisy environments. For very noisy areas or if the tag is deeply buried, visual tracking on the map may be more effective.

Inaccurate Location

- Location accuracy depends on the density of Apple devices in the vicinity of your tag. In areas with fewer devices, the location might be less precise.
- Ensure your iOS device has a stable internet connection for the most up-to-date location information.

8. WARRANTY AND SUPPORT

For warranty information and customer support, please refer to the product packaging or contact AIYATO customer service directly. Keep your proof of purchase for any warranty claims.
