OPERATING INSTRUCTIONS

Using the Bassinet Mode

The bassinet mode is suitable for infants who cannot yet push up on their hands and knees. Ensure the bassinet is securely zipped into the upper position. This provides a raised sleeping surface for easy access to your baby.

Using the Playard Mode

For older babies and toddlers, remove the bassinet insert. The lower level provides a spacious and secure area for play. The mesh sides offer visibility and airflow.

Utilizing the Zipper Door

The convenient zipper door allows your child to crawl in and out independently, fostering their development and interaction. Always ensure the zipper is closed when the child is inside and unsupervised.
