

Tera 1300

Tera Pro 1300 Wireless 1D 2D QR Barcode Scanner User Manual

Model: 1300

1. PRODUCT OVERVIEW

The Tera Pro 1300 is a compact and versatile barcode scanner designed for efficient data capture. It supports 1D and 2D barcodes, including QR codes, from both printed materials and digital screens. This device offers multiple connection options and features a long-lasting battery for extended use.

Image: The Tera Pro 1300 barcode scanner, a compact device designed for portability and ease of use.

Package Contents:

- Barcode Scanner (x1)
- USB Cable (x1)
- 2.4G USB Dongle (x1)
- User Manual (x1)

2. SETUP AND CONNECTION

The Tera Pro 1300 offers three connection methods: Bluetooth, 2.4GHz Wireless, and USB Wired. Choose the method that best suits your device and environment.

1300 Portable 1D 2D QR Barcode Scanner

Image: Visual representation of the three connection modes: Bluetooth, 2.4GHz Wireless via USB dongle, and USB Wired connection.

2.1. Charging the Scanner

Before first use, fully charge the scanner using the provided USB cable. Connect the small end of the USB cable to the scanner's charging port and the other end to a USB power adapter or a computer's USB port. A full charge typically takes 3-4 hours.

2.2. Bluetooth Connection

1. Ensure the scanner is powered on.
2. Scan the 'Bluetooth Pairing' barcode (refer to the included quick start guide or the full manual for specific barcode).
3. On your host device (laptop, PC, mobile phone, tablet), enable Bluetooth and search for available devices.
4. Select 'Tera 1300' or a similar name from the list of devices to pair.
5. The scanner will indicate successful pairing (e.g., a beep or LED change).

Supports HID, SPP, and BLE modes. Transmission distance is approximately 10m (33ft) in environments with obstacles.

2.3. 2.4GHz Wireless Connection

1. Insert the 2.4G USB dongle into an available USB port on your computer.
2. Ensure the scanner is powered on.
3. The scanner should automatically connect to the dongle. A successful connection is typically indicated by a beep or LED change.

This mode works with Windows XP/7/8/10, Mac OS, and Linux. The transmission distance can reach up to 60m (200ft) in open, barrier-free environments.

2.4. USB Wired Connection

1. Connect the scanner to your computer using the provided USB cable.
2. The scanner will function as a wired device and will also charge simultaneously.

3. OPERATING INSTRUCTIONS

3.1. Basic Scanning

Point the scanner's window at the barcode you wish to scan and press the trigger button. A successful scan will typically result in a beep and/or vibration, and the data will be transmitted to your connected device.

Image: The scanner demonstrates its ability to read various 1D and 2D barcodes, including those that are blurred, damaged, or have wide scanning angles.

3.2. Time Prefix/Suffix Function

This function allows you to add the current time as a prefix or suffix to scanned barcode data. This is useful for tracking the exact time of each scan.

- To enable/disable this feature, scan the specific setting barcodes provided in the full user manual.

Image: Example of barcode data being scanned and displayed on a computer screen, demonstrating the time prefix/suffix function.

3.3. Vibration Alert & Upload Modes

The scanner features a vibration alert, which can be used in quiet environments where audible beeps are undesirable. You can turn off the volume and rely on vibration for scan confirmation.

The scanner supports two upload modes:

- **Instant Upload Mode:** Barcode data is transmitted immediately after scanning.
- **Storage Mode:** Barcode data is stored internally in the scanner's memory. This mode is useful when the scanner is out of range of the receiver. The internal storage can hold up to 20,000 barcodes. Data can be batch uploaded to your device when reconnected.

3.4. Multi-Language Support

The scanner supports various keyboard layouts for different languages, including English, German, Spanish, Italian, French, Japanese, Belgian, Portuguese, and Dutch. Refer to the full manual for instructions on how to configure the scanner for your desired language.

Image: The scanner supports multiple languages, indicated by flags of various countries.

4. MAINTENANCE

4.1. Battery Care

The Tera Pro 1300 is equipped with a 1200mAh battery, providing approximately 12 hours of continuous scanning or up to two weeks of daily use on a full charge. Standby time is approximately 96 hours.

- Avoid fully discharging the battery frequently to prolong its lifespan.
- Store the scanner in a cool, dry place when not in use for extended periods.
- Charge the scanner regularly, even if not in constant use, to maintain battery health.

96 hours
Standby Time

Image: Details on the scanner's 1200mAh battery, offering 12 hours of continuous operation and 3-4 hours charging time.

4.2. Cleaning

To clean the scanner, use a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by a dry cloth. Avoid using harsh chemicals or abrasive materials, as these can damage the device.

5. TROUBLESHOOTING

If you encounter issues with your Tera Pro 1300 scanner, refer to the following common problems and solutions:

Problem	Possible Solution
Scanner does not power on.	Ensure the battery is charged. Connect the scanner to a power source using the USB cable.

Problem	Possible Solution
Scanner does not connect via Bluetooth/2.4GHz.	Verify the scanner is in the correct pairing mode. Ensure the dongle is properly inserted for 2.4GHz. Check Bluetooth settings on your host device. Try restarting both the scanner and the host device.
Scanned data is incorrect or inconsistent.	Ensure the barcode is clean and undamaged. Try scanning from a different angle or distance. Check if the scanner's configuration (e.g., prefix/suffix settings, keyboard layout) is correct for your needs. Perform a factory reset if necessary (refer to the full manual for the reset barcode).
Scanner adds extra characters (e.g., 'a') to scanned data.	This often indicates an incorrect keyboard language setting. Scan the appropriate language setting barcode from the full user manual to match your computer's keyboard layout.
Scanner does not read certain barcode types.	Ensure the barcode type is supported by the Tera Pro 1300 (see Specifications section). Some less common barcode types may require specific enabling scans from the manual.

6. SPECIFICATIONS

Feature	Detail
Model Number	1300
Dimensions	6.65 x 4.61 x 1.65 inches
Item Weight	7.4 ounces
Power Source	Battery Powered, Corded Electric
Battery Capacity	1200mAh
Continuous Working Time	Up to 12 hours
Charging Time	3-4 hours
Standby Time	Up to 96 hours
Connectivity Technology	2.4G Wireless, Bluetooth, USB Cable
Compatible Devices	Desktop, Laptop, Smartphone, Tablet (Windows XP/7/8/10, Mac OS, Windows Mobile, Android OS, iOS)
1D Decode Capability	Codabar, Code 11, Code93, MSI, Code 128, UCC/EAN-128, Code 39, EAN-8, EAN-13, UPC-A, ISBN, Industrial 25, Interleaved 25, Standard 25, 2/5 Matrix

Feature	Detail
2D Decode Capability	QR, PDF417, Data Matrix, Aztec code, Maxi Code
Real Angle of View	10 Degrees

7. WARRANTY AND SUPPORT

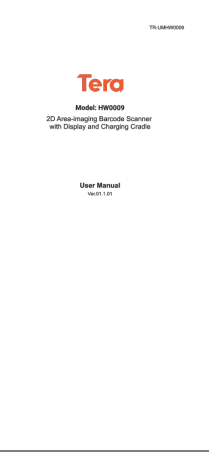

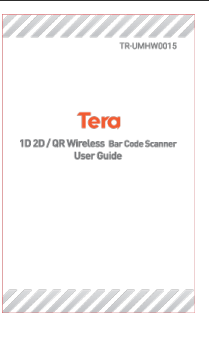

For warranty information and technical support, please refer to the official Tera website or contact their customer service directly. Contact details are typically found on the product packaging or the manufacturer's website.

You can visit the Tera Store for additional product information and support resources:[Tera Store on Amazon](#)
