Cecotec PureVital 2900

Cecotec VisComfort + Flow PureVital 2900 Memory Foam Mattress Instruction Manual

Model: PureVital 2900

INTRODUCTION

This manual provides essential information for the proper use, care, and maintenance of your Cecotec VisComfort + Flow PureVital 2900 Memory Foam Mattress. Please read these instructions carefully before use to ensure optimal performance and longevity of your mattress.

The Cecotec VisComfort + Flow PureVital 2900 mattress features a multi-layer design with a total height of 23 cm, offering high firmness and a FoamVital core for support. It incorporates a Dual System with distinct sides for winter and summer use, enhancing comfort throughout the year.

SAFETY WARNINGS

Important Safety Information:

- This mattress contains a VisComfort+ viscoelastic layer designed to conform to your body's contours.
- It is crucial to use the appropriate side of the mattress according to the season (Dual System) to ensure optimal comfort and rest.
- Always follow the care and maintenance instructions provided in this manual to ensure the mattress's durability and safety.
- Keep the mattress away from open flames and heat sources.
- Do not use harsh chemicals or abrasive cleaners on the mattress.

SETUP AND UNPACKING

Your Cecotec VisComfort + Flow PureVital 2900 mattress is typically delivered compressed and rolled. Follow these steps for proper setup:

- 1. Preparation:** Ensure you have a clean, flat surface (such as a bed frame or foundation) ready for the mattress. Make sure there is enough space around the bed for the mattress to expand.
- 2. Unpack:** Carefully remove the mattress from its outer packaging. Avoid using sharp objects that could cut the mattress fabric.
- 3. Positioning:** Place the rolled mattress onto your bed frame or foundation.
- 4. Unroll:** Carefully cut and remove the plastic wrapping. The mattress will begin to unroll and expand immediately.
- 5. Expansion:** Allow the mattress to fully expand for 24 to 72 hours. During this time, it will reach its intended shape and firmness. Some initial off-gassing odor is normal and will dissipate. Ensure good ventilation in the room.

OPERATING (USAGE)

The PureVital 2900 mattress is designed for optimal comfort and support. Key features include:

- **VisComfort+ Viscoelastic Layer:** This layer adapts to your body's contours, providing personalized support and pressure relief.
- **FoamVital Core:** Provides high firmness and structural resistance to the entire mattress, ensuring long-lasting support.
- **Dual System (Winter/Summer Sides):** The mattress features two distinct sleeping surfaces.
 - **Winter Side:** Designed for warmth and comfort during colder months.
 - **Summer Side:** Designed for enhanced breathability and coolness during warmer months.

To utilize the Dual System, simply flip the mattress to the appropriate side for the current season. This helps regulate body temperature and improves sleep quality.

MAINTENANCE AND CARE

Proper maintenance will extend the life of your mattress and ensure hygienic use:

- **Rotation and Flipping:** To ensure even wear and prolong the mattress's lifespan, rotate the mattress head-to-foot every 3-6 months. Additionally, flip the mattress seasonally to utilize the appropriate winter or summer side.
- **Cleaning Spills:** Immediately blot any spills with a clean, dry cloth. For stubborn stains, use a mild soap solution and a damp cloth, then allow to air dry completely. Avoid saturating the mattress.
- **Protection:** Use a mattress protector to shield against spills, dust mites, and allergens.
- **Ventilation:** Periodically air out your mattress by removing bedding for a few hours. This helps to dissipate moisture and maintain freshness.
- **Support:** Ensure your mattress is placed on a suitable, supportive bed frame or foundation to prevent sagging and maintain its structural integrity.

- **Avoid Jumping:** Do not jump on the mattress, as this can damage the internal structure and void the warranty.

TROUBLESHOOTING

If you encounter any issues with your mattress, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Initial Odor	"New mattress" smell (off-gassing) from manufacturing.	This is normal. Allow the mattress to air out in a well-ventilated room for 24-72 hours. The odor will dissipate.
Mattress not fully expanded	Insufficient time for expansion after unpacking.	Ensure the mattress has been out of its packaging for at least 72 hours. Temperature and humidity can affect expansion time.
Discomfort or uneven feel	Improper mattress support or uneven wear.	Verify that your bed frame or foundation provides adequate, even support. Rotate and flip the mattress regularly as per maintenance instructions.
Mattress feels too hot/cold	Using the incorrect seasonal side of the mattress.	Flip the mattress to the appropriate side for the current season (winter side for warmth, summer side for coolness).

If the problem persists after attempting these solutions, please contact Cecotec customer support.

SPECIFICATIONS

Feature	Detail
Brand	Cecotec
Model Number	07938
Product Name	VisComfort + Flow PureVital 2900
Color	Purevital 2900
Dimensions (L x W x H)	190 x 110 x 23 cm
