Cecotec Bolero Combi 250 Refrigerator User Manual

1. INTRODUCTION

Thank you for choosing the Cecotec Bolero Combi 250 Refrigerator. This manual provides essential information for the safe and efficient operation, installation, and maintenance of your appliance. Please read it thoroughly before use and keep it for future reference.

The Cecotec Bolero Combi 250 is a combined refrigerator-freezer unit designed for optimal food preservation. Key features include:

- **Total No Frost System:** Prevents ice build-up in both the refrigerator and freezer compartments, eliminating the need for manual defrosting.
- **Multi Air Flow System:** Ensures uniform distribution of cold air throughout the refrigerator, maintaining a stable temperature for longer food freshness.
- **Energy Efficiency Class E:** Optimized for energy consumption.
- **Humidity Box & Crisper Box:** Specialized drawers for preserving fruits and vegetables with adjustable humidity.
- **Reversible Door:** Allows for flexible installation by changing the door opening direction.
- **Door Alarm:** Alerts you if the door is left open for too long.

Figure 1: Front view of the Cecotec Bolero Combi 250 Refrigerator.

2. SAFETY INSTRUCTIONS

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and injury.

- Ensure the appliance is properly grounded.
- Do not use electrical appliances inside the food storage compartments unless they are of the type recommended by the manufacturer.
- Keep ventilation openings clear of obstruction.
- Do not damage the refrigerant circuit.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

3. SETUP AND INSTALLATION

3.1 Unpacking

Carefully remove all packaging materials. Inspect the appliance for any damage. Report any damage to your retailer immediately.

3.2 Placement

- Place the refrigerator on a firm, level surface.
- Ensure adequate ventilation around the appliance. Leave at least 10 cm of space at the back and sides for proper air circulation.
- Avoid placing the appliance in direct sunlight or near heat sources (e.g., ovens, radiators).
- Do not install in areas where the temperature is likely to fall below 10°C (50°F).

Figure 2: Dimensions of the Cecotec Bolero Combi 250 Refrigerator (approx. 59D x 54W x 180H cm).

3.3 Door Reversal (Optional)

The door hinges can be reversed to open from the left or right, depending on your kitchen layout. This procedure should be performed by a qualified technician or by carefully following the detailed instructions provided in the full manual (not included here).

3.4 Initial Power-On

After positioning the appliance, wait at least 2-4 hours before plugging it into the power outlet. This allows the refrigerant to settle. Once plugged in, set the temperature control to the desired setting and allow the appliance to cool for several hours before loading food.

4. OPERATING INSTRUCTIONS

4.1 Temperature Control

The refrigerator features an internal temperature control system. Adjust the thermostat to your preferred setting. A medium setting is generally recommended for optimal food preservation and energy efficiency.

4.2 Multi Air Flow and Total No Frost

The Multi Air Flow system circulates cold air evenly, ensuring consistent temperatures throughout the refrigerator compartment. Combined with the Total No Frost technology, this prevents ice formation and maintains food quality without manual defrosting.

Figure 3: Illustration of the Total No Frost system, showing frost-free frozen items.

4.3 Crisper Box and Humidity Box

Utilize the dedicated Crisper Box and Humidity Box drawers for storing fruits and vegetables. These drawers are designed to maintain optimal humidity levels, extending the freshness of produce.

Figure 4: Interior view of the refrigerator, highlighting the Crisper Box and freezer drawers.

4.4 Door Alarm

The integrated door alarm will sound if the refrigerator door is left open for an extended period, helping to prevent temperature fluctuations and energy waste.

5. MAINTENANCE AND CLEANING

5.1 Cleaning the Interior

Unplug the appliance before cleaning. Clean the interior regularly with a soft cloth dampened with a solution of

lukewarm water and a mild, non-abrasive detergent. Rinse and dry thoroughly. Do not use harsh chemicals or abrasive cleaners.

5.2 Cleaning the Exterior

Wipe the exterior surfaces with a soft, damp cloth. For stainless steel finishes, use a specialized stainless steel cleaner. Avoid getting water into electrical components.

5.3 Defrosting

This appliance features a Total No Frost system, meaning manual defrosting is not required for either the refrigerator or freezer compartments. If ice build-up occurs, it may indicate an issue with the door seal or excessive humidity introduction.

5.4 Power Outages

In case of a power outage, keep the refrigerator and freezer doors closed to maintain the internal temperature for as long as possible. Avoid opening the doors unnecessarily.

6. TROUBLESHOOTING

Before contacting customer service, please check the following common issues and solutions:

Problem	Possible Cause	Solution
Appliance does not operate	No power supply; power cord not plugged in; fuse blown.	Check power connection; check household fuse.
Temperature is not cold enough	Temperature setting too high; door opened too frequently; large amount of warm food added; poor ventilation.	Adjust temperature setting; reduce door openings; allow food to cool before storing; ensure proper ventilation.
Unusual noises	Appliance not level; parts vibrating; objects touching the back wall.	Adjust leveling feet; ensure no parts are loose; move objects away from the back wall.
Door does not close properly	Appliance not level; door gasket dirty or damaged; food packages obstructing closure.	Adjust leveling feet; clean or replace door gasket; rearrange food items.
