KODIAK 25942

LitezAll Kodiak 1 Mile Beam Tactical Flashlight User Manual

Model: 25942

Introduction

Thank you for choosing the LitezAll Kodiak 1 Mile Beam Tactical Flashlight. This high-performance LED flashlight is engineered for extreme range and durability, making it ideal for a variety of uses including outdoor activities, emergency situations, and professional work. Its robust aerospace-grade aluminum construction, powerful beam, and practical features like a magnetic base and safety lockout ensure reliable performance when you need it most.

Setup

Battery Installation and Charging

The Kodiak flashlight comes with a pre-installed Lithium Polymer battery. Before first use, it is recommended to fully charge the flashlight.

1. Locate the charging port, typically covered by a rubber flap, on the side of the flashlight.
2. Connect the included charging cord to the flashlight's charging port and the other end to a compatible USB power source (e.g., wall adapter, computer USB port).

3. The charging indicator light will illuminate, typically red while charging and green when fully charged.
4. A full charge may take several hours. Once charged, disconnect the cable and ensure the rubber flap is securely closed to protect the port from dust and moisture.

Initial Use

After charging, the flashlight is ready for operation. Familiarize yourself with the main power button and mode selection.

Operating Instructions

Power On/Off and Brightness Modes

The Kodiak flashlight features multiple brightness modes for versatile use.

1. **To Power On:** Press the main power button once. The flashlight will typically turn on in its last used mode or a default high mode.
2. **To Change Brightness:** While the flashlight is on, press the power button repeatedly to cycle through available brightness modes (e.g., High, Low).
3. **To Power Off:** Press the power button until the flashlight turns off, or hold the button down for a few seconds.

Image: Illustration showing the two brightness modes: High (1000 lumens, 12 hours) and Low (500 lumens, 22 hours), along with the 4900'+ beam distance and 5000 mAh rechargeable battery.

Safety Lockout Feature

The safety lockout feature prevents accidental activation during transport or storage, conserving battery life and preventing unintended illumination.

- **To Engage Lockout:** Typically, press and hold the power button for a specified duration (e.g., 3-5 seconds) until the light flashes or indicates lockout mode. Refer to the specific product packaging for exact instructions if needed.
- **To Disengage Lockout:** Repeat the same action (press and hold the power button) until the light turns on or indicates it's unlocked.

Magnetic Base Functionality

The integrated magnetic base allows for convenient hands-free lighting.

- Simply attach the magnetic base of the flashlight to any ferrous metal surface.
- This is ideal for working on vehicles, in workshops, or any situation where you need illumination without holding the flashlight.

Powerbank Function (if applicable)

Some models of the Kodiak flashlight may include a powerbank function, allowing you to charge small electronic devices.

- Locate the USB output port, usually next to the charging input port.
- Connect your device's charging cable to this port. The flashlight's battery will then provide power to charge your device.

Maintenance

Cleaning

- Wipe the flashlight body with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Keep the lens clean for optimal light output. Use a lens cleaning cloth if necessary.

Storage

- Store the flashlight in a cool, dry place away from direct sunlight and extreme temperatures.
- For long-term storage, ensure the battery is partially charged (around 50%) and recharge it every 3-6 months to maintain battery health.

Battery Care

- Avoid fully depleting the battery before recharging, as this can shorten its lifespan.
- Use only the provided charging cable or a compatible USB charger.

Troubleshooting

Flashlight Not Turning On

- **Check Battery:** Ensure the battery is charged. Connect to a charger and observe the charging indicator.
- **Safety Lockout:** Verify that the safety lockout feature is not engaged. Disengage it as per the operating instructions.
- **Button Malfunction:** If the button feels stuck or unresponsive, gently clean around it. If the issue persists, contact customer support.

Dim Light Output

- **Low Battery:** The battery may be low. Recharge the flashlight fully.
- **Dirty Lens:** Clean the flashlight lens with a soft cloth to remove any dirt or smudges that might be obstructing the light.

Charging Issues

- **Cable Connection:** Ensure the charging cable is securely connected to both the flashlight and the power source.
- **Power Source:** Try a different USB power adapter or port to rule out issues with the power source.
- **Damaged Cable:** Inspect the charging cable for any signs of damage. Use a different compatible cable if available.

Specifications

Feature	Detail
Brand	KODIAK
Model Number	25942
Light Source Type	LED
Brightness	1000 Lumens (High) / 500 Lumens (Low)
Beam Distance	Up to 4921 Feet (Nearly 1 Mile)
Power Source	Battery Powered (Rechargeable)

Battery Type	Lithium Polymer (5000 mAh)
Material	Aerospace-Grade Aluminum
