MAINTENANCE

1. Cleaning

Regularly clean the scanner's lens and exterior with a soft, dry, lint-free cloth. Avoid using abrasive cleaners or solvents that could damage the device.

2. Battery Care

The scanner uses a Lithium Polymer battery. To prolong battery life, avoid fully discharging the battery frequently. Charge the device regularly, especially if it will be stored for an extended period.

3. Storage

Store the scanner in a cool, dry place away from direct sunlight and extreme temperatures. Ensure the power

is off when not in use for prolonged periods.

TROUBLESHOOTING

1. Scanner Not Turning On

- Ensure the power switch is in the 'ON' position.
- Press the side 'OK/Scan' button to activate the device.
- Check battery level; charge the scanner if the battery is low.

2. Unable to Connect via Bluetooth/2.4G Wireless

- Ensure the scanner is in the correct pairing mode (Bluetooth HID or 2.4G Wireless).
- For Bluetooth, ensure your host device's Bluetooth is enabled and discoverable.
- For 2.4G Wireless, ensure the USB dongle is securely plugged into your computer.
- Try restarting both the scanner and the host device.

3. Scanned Data Not Appearing

- Verify the scanner is successfully connected to your host device.
- Ensure the host device has an active text input field selected (e.g., notepad, spreadsheet).
- If in Storage Mode, ensure you have initiated the 'Upload Data' function.
