# SHA CERLIN King Size Lift Up Storage Bed Instruction Manual

Model: AK-KBMV0006 | Brand: SHA CERLIN

## INTRODUCTION

Thank you for choosing the SHA CERLIN King Size Lift Up Storage Bed. This manual provides detailed instructions for the safe assembly, operation, and maintenance of your new bed frame. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

## SAFETY INFORMATION

**Caution:** Adhere to all safety guidelines to prevent injury or damage to the product.

- Use the hydraulic lifting mechanism carefully to avoid injury. Ensure hands and fingers are clear of moving parts when operating.
- Always assemble the bed frame according to the provided instructions to prevent instability or collapse. Do not deviate from the steps.
- Be careful around sharp edges, especially during assembly and when using the lifting mechanism.
- Ensure all bolts and fasteners are securely tightened before use and periodically check for looseness.
- Do not exceed the maximum weight capacity of the bed frame (800 lbs) or the lifting mechanism (135 lbs for mattress/bedding).
- Keep children and pets away from the assembly area.

## PACKAGE CONTENTS

Before assembly, verify that all components are present and undamaged. If any parts are missing or damaged, contact customer support.

- Bed Frame Components
- Headboard (Wingback design)

- Wood Slats with Plastic Buckles
- Hydraulic Lifting Mechanism
- Assembly Hardware (bolts, nuts, washers, tools)

## ASSEMBLY INSTRUCTIONS

---

Assembly typically requires two adults. Follow the steps in the order presented. All parts are labeled for easy identification.

### Step 1: Unpack and Identify Parts

Carefully unpack all components from the packaging. Lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided parts list in your physical manual.

### Step 2: Assemble the Bed Frame Base

Connect the side rails and footboard to the headboard. Ensure all connections are secure but do not fully tighten bolts until the frame is fully assembled.

### Step 3: Install the Hydraulic Lifting Mechanism

Attach the hydraulic lifting arms to the designated points on the bed frame. Follow the specific diagrams in your manual for correct orientation and secure fastening. Ensure the mechanism moves freely before proceeding.

This image displays the SHA CERLIN King Size Lift Up Storage Bed with the mattress platform raised, showcasing the large storage compartment beneath. Various items like suitcases and storage boxes are visible, demonstrating the practical use of the hydraulic lift mechanism.

#### **Step 4: Attach the Slats**

Insert the solid wood slats into the plastic buckles on the bed frame. Ensure each slat is firmly seated and evenly spaced. The plastic buckles facilitate easy and secure slat installation.

Solid wood slats with smart assembly

Thick attached foams to mute noises

Sturdy metal structure support

This image highlights key construction details of the bed frame. It shows the solid wood slats designed for smart assembly, thick foam padding attached to the metal beams to mute noises, and the robust metal structure providing strong support for the mattress.

### Step 5: Final Tightening

Once all components are in place, systematically tighten all bolts and fasteners. Do not overtighten. Ensure the frame is stable and level.

## OPERATING THE LIFT MECHANISM

The SHA CERLIN bed features a hydraulic lift mechanism for easy access to under-bed storage.

### To Lift the Bed Platform:

1. Remove any pillows or loose bedding from the top of the mattress.
2. Grasp the handle or edge of the mattress platform firmly, typically located at the foot end or side.
3. Gently lift upwards. The hydraulic pistons will assist in raising the platform smoothly and holding it in the open position.

4. Ensure the platform is fully raised and stable before accessing the storage area.

### To Lower the Bed Platform:

1. Ensure no items are obstructing the lowering path within the storage area.
2. Grasp the handle or edge of the mattress platform.
3. Apply gentle downward pressure. The hydraulic pistons will control the descent, allowing the platform to lower slowly and safely.
4. Ensure the platform is fully lowered and latched (if applicable) before placing bedding back on the mattress.

## AMPLE STORAGE SPACE

Hydraulic lift design provides large and closed underneath storage space

## ANTI-FALLING DEVICE

To stop your bedding from sliding

This image illustrates the hydraulic lift mechanism that provides ample storage space. It also points out the integrated anti-falling device, a protective feature designed to prevent the mattress and bedding from sliding when the platform is lifted.

# Maximum Weight Capacity

## When Lifting Up: 135 lbs

This image specifies that the maximum weight capacity for the mattress and bedding when lifting the platform is 135 lbs. This ensures safe and smooth operation of the hydraulic mechanism.

## CARE AND MAINTENANCE

Proper care will extend the life and appearance of your bed frame.

- **Cleaning:** For the upholstered parts, gently spot clean with a damp cloth and mild detergent if necessary. Blot dry immediately. Do not use harsh chemicals or abrasive cleaners.
- **Frame:** Wipe metal and wood components with a dry or slightly damp cloth.
- **Fasteners:** Periodically check all bolts and screws to ensure they remain tight. Retighten as needed to maintain stability and prevent squeaking.
- **Hydraulic Mechanism:** Keep the hydraulic pistons clean and free of debris. Do not apply lubricants unless specifically instructed by the manufacturer.
- **Ventilation:** Ensure adequate air circulation around and under the bed, especially if storing items, to prevent moisture buildup.

## TROUBLESHOOTING

---

If you encounter issues with your bed frame, refer to the following common problems and solutions.

- **Squeaking Noises:**

- Ensure all bolts and fasteners are securely tightened. Loose connections are a common cause of squeaking.
- Check that slats are properly seated in their buckles and not rubbing against the frame.
- Verify that the mattress is compatible and not causing friction with the frame.

- **Hydraulic Lift Not Working Smoothly:**

- Ensure the mattress weight is within the recommended lifting capacity (max 135 lbs). An excessively heavy mattress can hinder operation.
- Check for any obstructions in the hydraulic mechanism's path.
- Verify that the hydraulic arms are correctly installed and not damaged.

- **Bed Frame Feels Unstable:**

- Re-check all assembly connections and tighten any loose bolts.
- Ensure the bed is placed on a flat, level surface.
- Confirm that all components are installed in the correct orientation as per the assembly manual.

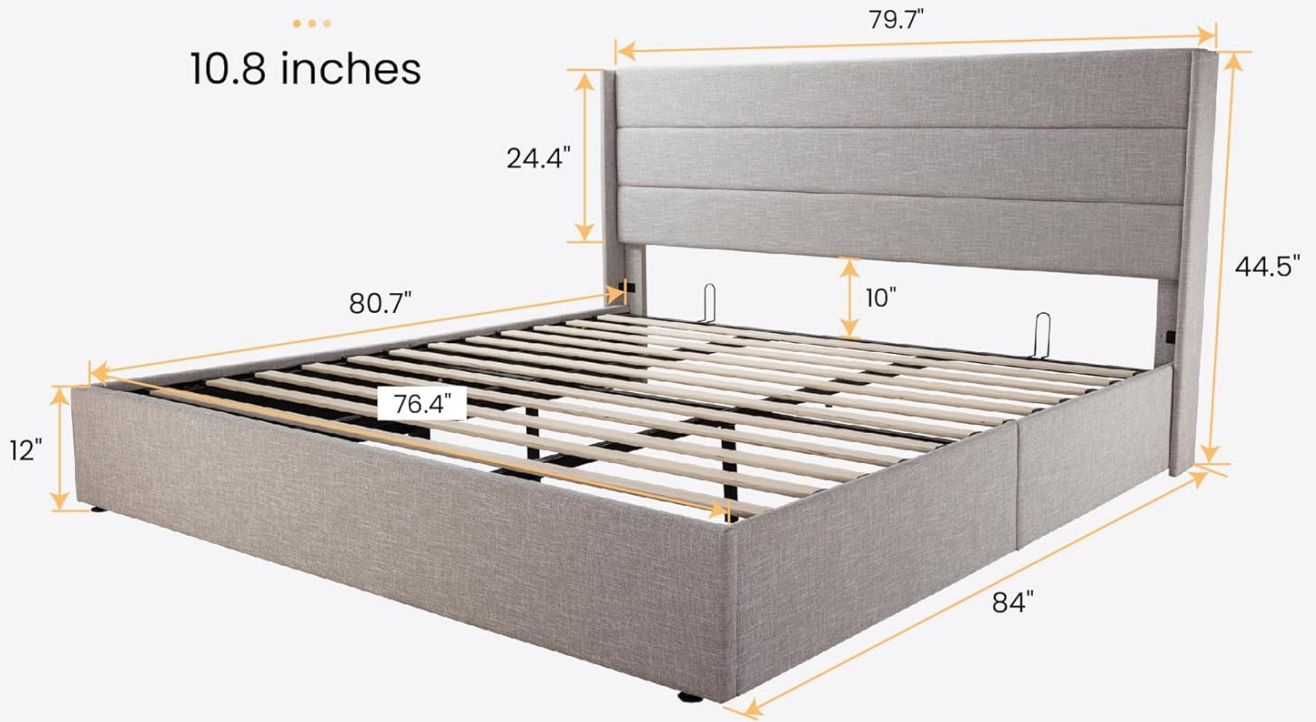

## SPECIFICATIONS

---

# PRODUCT INFORMATION

## Under Bed Storage Height: (slats to floor)

10.8 inches

King Size

### Dimensions

L x W x H  
84" x 79.7" x 44.5"

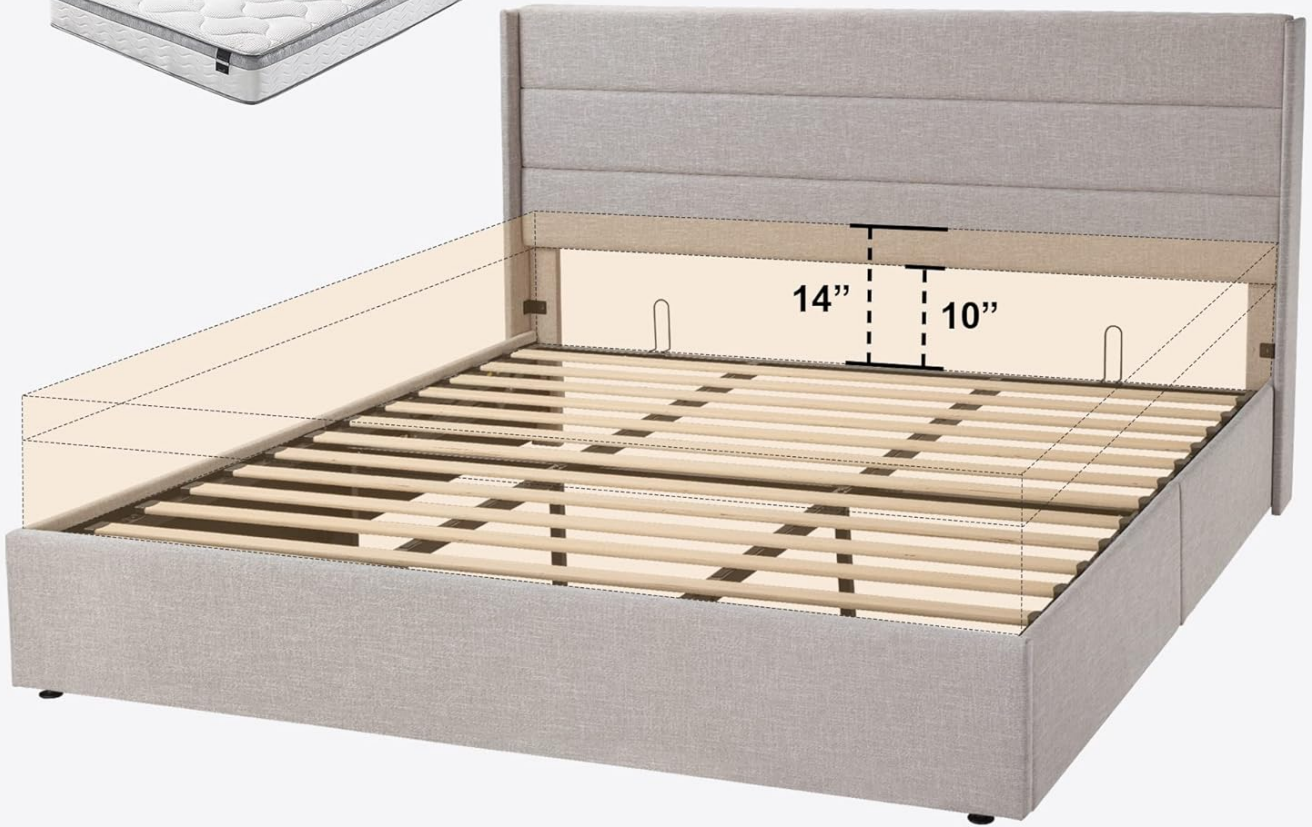

### Weight Capacity

800 lbs.

This diagram provides precise measurements for the SHA CERLIN King Size Lift Up Storage Bed, including overall length (84 inches), width (79.7 inches), headboard height (44.5 inches), and under-bed storage height (10.8 inches from slats to floor). It also indicates a weight capacity of 800 lbs.

..... Recommended Height of Mattress .....

10-14 inches

This visual guide recommends a mattress height between 10 and 14 inches for optimal fit and aesthetic with the SHA CERLIN bed frame, ensuring proper headboard coverage and comfort.

Feature	Detail
Model Number	AK-KBMV0006
Size	King
Product Dimensions (L x W x H)	84"L x 79.7"W x 44.5"H
Color	Light Beige
Material	Fabric, Wood, Metal
Item Weight	136 pounds
Weight Capacity (Bed Frame)	800 lbs

Weight Capacity (Lifting)	135 lbs (for mattress/bedding)
Special Features	Lift Up Storage, Squeak Resistant, Wingback Headboard
Box Spring Needed	No
Recommended Mattress Height	10-14 inches
Assembly Required	Yes

## WARRANTY AND SUPPORT

---

For warranty information or technical support, please refer to the purchase documentation or contact SHA CERLIN customer service directly. Keep your proof of purchase for any warranty claims.
