

GIVERARE TSA-109

GIVERARE TSA Approved 3-Digit Combination Travel Luggage Locks (Model TSA-109) User Manual

Brand: GIVERARE | Model: TSA-109

INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your GIVERARE TSA Approved 3-Digit Combination Travel Luggage Locks. Please read this manual thoroughly before using your locks to ensure proper function and security.

PRODUCT OVERVIEW

The GIVERARE TSA Approved 3-Digit Combination Travel Luggage Locks are designed for securing luggage, backpacks, gym lockers, and other items. They feature a 3-digit resettable combination and are Travel Sentry Accepted, allowing TSA agents to inspect your baggage without damaging the lock.

Key Features:

- **TSA Approved:** Allows TSA screeners to inspect and re-lock baggage without damage.
- **Easy Setting Keyless Dial:** Simple 2-step process to set your personal combination.
- **Durable Construction:** Hardened steel shackle and high-impact ABS housing for resistance to rust, corrosion, and cutting.
- **Versatile Use:** Suitable for luggage, hard cases, gun cases, briefcases, lockers, purses, backpacks, and laptop bags.
- **Waterproof:** Can be used in outdoor situations.

This image displays four black GIVERARE TSA Approved 3-Digit Combination Travel Luggage Locks, showcasing their design and the TSA logo.

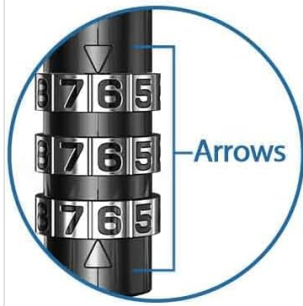

SETTING YOUR COMBINATION

Your lock is preset to open at **0-0-0**. Follow these steps to set your personal combination:

1. Align the dials to the original combination **0-0-0** with the arrows on the side.
2. Pull up the shackle to open the lock.
3. Rotate the shackle 90 degrees counterclockwise.
4. Press down the shackle firmly until the small hook on the bottom of the shackle enters into the hole.
5. While holding the shackle down, rotate it another 45 degrees counterclockwise to hold it in place.
6. Set your desired 3-digit combination by rotating the dials. Ensure the numbers are aligned with the arrows.
7. Once your new combination is set, pull up the shackle to release it from the pressed-down position.
8. Rotate the shackle back to its original position and push it down to lock. Scramble the dials to secure your new combination.

Important Note: When setting your own combination, please align the desired number exactly with the arrows. Remember your combination, as there is no master key to reset it if forgotten.

HOW TO USE & SET NEW COMBINATION

1. The original is 0-0-0, align the dials exactly to 0-0-0 with the arrows on the side.

2. Pull up the shackle to open and rotate the shackle 90° counterclockwise.

3. Press down the shackle to make the small hook on the bottom of the shackle enter into the hole, rotate another 45° counterclockwise to hold on the hook.

4. Set your own combination, rotate and pull up the shackle back to lock, scramble the dials.

Note: When setting your own combination, please align the desired number exactly with the arrows.

This diagram illustrates the four steps to set a new combination: 1. Aligning to 0-0-0, 2. Pulling up and rotating the shackle 90 degrees, 3. Pressing down and rotating another 45 degrees, 4. Setting the new combination and releasing the shackle.

OPERATING THE LOCK

Opening the Lock:

1. Align the dials to your set 3-digit combination.
2. Pull up the shackle to open the lock.

Closing the Lock:

1. Insert the shackle into the lock body.
2. Push the shackle down until it clicks into place.
3. Scramble the dials to secure the lock.

EASY TO STORE & CARRY

This image shows a GIVERARE TSA lock being held in a hand, highlighting its compact and portable design, making it easy to store and carry.

CARE AND MAINTENANCE

- Keep the lock clean and free from debris.
- Avoid exposing the lock to extreme temperatures for prolonged periods.
- If the dials become stiff, a small amount of lubricant can be applied to the moving parts.
- Do not attempt to force the shackle or dials, as this may damage the internal mechanism.

MODERATE SECURITY

TROUBLESHOOTING

Lock will not open with the correct combination:

- Ensure each number is perfectly aligned with the indicator marks.
- Verify that you are using the correct combination. If you have recently reset it, try the new combination.
- Check for any debris or foreign objects obstructing the dials or shackle mechanism.

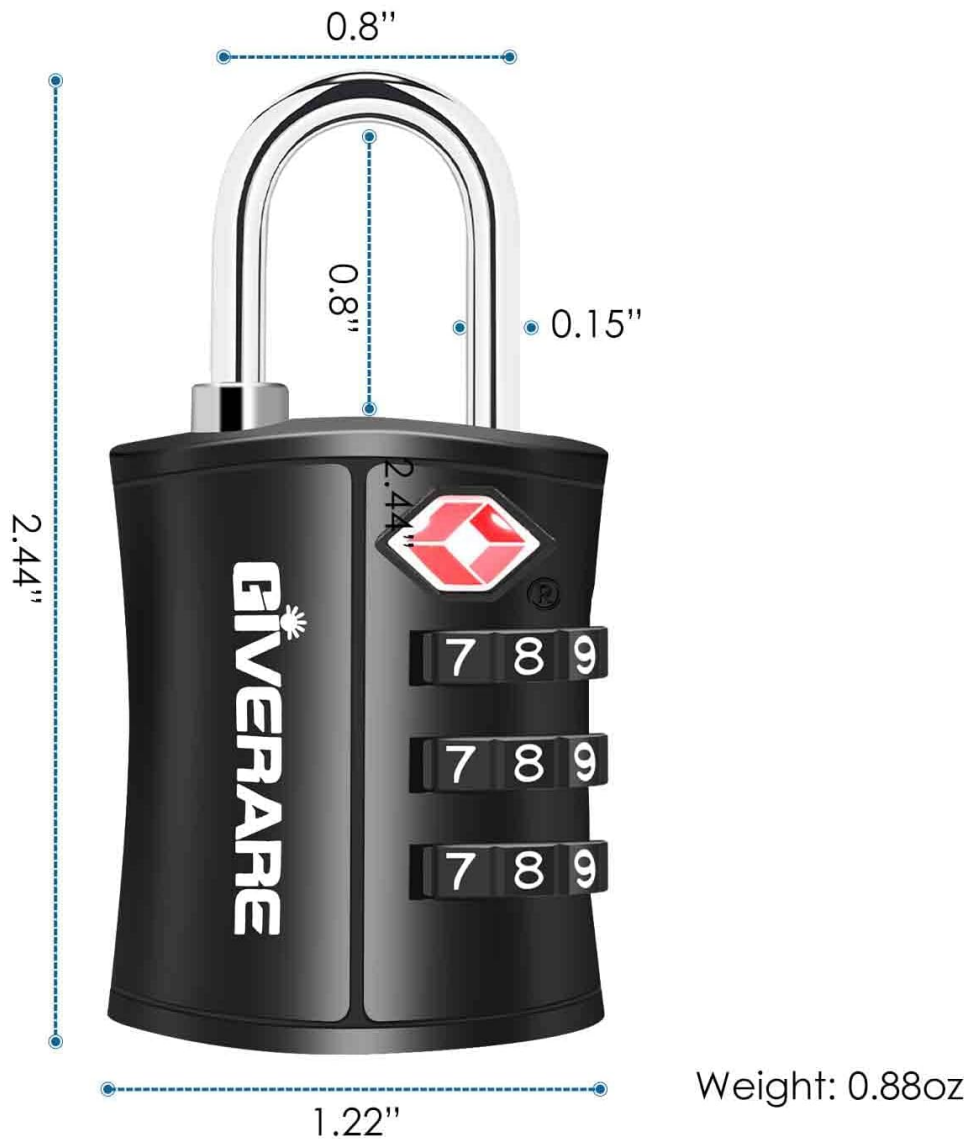

Shackle is stiff or difficult to move:

- Apply a small amount of silicone-based lubricant to the shackle and the opening mechanism.
- Ensure the lock is clean and free from dirt or grime.
