SETUP AND ASSEMBLY

Your Tribesigns Executive Desk requires assembly. Please follow these steps carefully. It is recommended that two people assemble this desk for ease and safety.

1. **Unpack Components:** Carefully unpack all parts and hardware from the packaging. Verify that all pieces are present by comparing them with the included parts list. Each piece is labeled for easy identification.
2. **Prepare Workspace:** Choose a clean, flat, and stable surface for assembly to prevent scratching or damaging the desk components.
3. **Assemble Frame:** Begin by assembling the metal frame components. Ensure all screws are loosely fitted initially to allow for adjustments. The 2" x 2" thicker metal tubes and welding triangular design provide stability.
4. **Attach Desktop Panels:** Carefully place the engineered wood desktop panels onto the assembled frame. Align the pre-drilled holes with the frame. The desktop consists of multiple pieces that fit flush together.
5. **Secure All Fasteners:** Once all components are aligned, tighten all screws and bolts securely. Do not overtighten.

6. **Install Floor Protectors:** Attach the adjustable floor protectors to the bottom of the desk legs. These allow for minor leveling adjustments and prevent scratching your floors when moving the desk.
7. **Apply Corner Protectors:** For added safety, especially in households with children, apply the provided clear corner protectors to the sharp corners of the desk.

All necessary hardware and tools (L-wrenches) are included in the package. If you encounter any issues during assembly, please refer to the troubleshooting section or contact customer service.

TRUBLESHOOTING

If you encounter any issues with your Tribesigns Executive Desk, please refer to the common problems and solutions below:

Problem	Possible Cause	Solution
Desk is wobbly or unstable.	Screws are not fully tightened; uneven floor; legs not properly aligned.	Ensure all assembly screws are tightened. Adjust the leveling feet at the bottom of the legs to compensate for uneven floors. Recheck leg alignment during assembly.
Holes do not align during assembly.	Parts are oriented incorrectly; screws overtightened prematurely.	Double-check the orientation of each part against the assembly diagrams. Loosen all screws, realign parts, and then tighten gradually. Ensure you are using the correct screws for each hole.
Scratches on floor when moving desk.	Floor protectors not installed or damaged.	Ensure the adjustable floor protectors are securely installed on each leg. If damaged, contact customer service for replacements. Always lift the desk slightly when moving it, rather than dragging.

If the problem persists or is not listed here, please contact Tribesigns customer support for assistance.
