3. SETUP

3.1. Initial Power On

1. **Charge the Laptop:** Before first use, connect the included AC adapter to the charging port on the left side of the laptop and plug it into a power outlet. Allow the battery to charge fully. The charging indicator light will typically change color or turn off when fully charged.

2. **Power On:** Open the laptop lid. Press the power button, usually located on the top right of the keyboard or side.

3. **Windows Setup:** Follow the on-screen instructions to complete the Windows 11 setup process. This includes selecting your region, language, connecting to a Wi-Fi network, accepting terms, and creating a user account.

3.2. Connecting Peripherals

Your laptop offers various ports for connecting external devices:

- **USB Ports (USB 3.0 x 2, USB Type-C x 1):** Connect USB devices such as external hard drives, mice, keyboards, or printers.
- **HDMI Output:** Connect to an external monitor, TV, or projector for a larger display.
- **Micro SD Slot:** Insert a Micro SD card for additional storage or data transfer.
- **Headphone Port:** Connect headphones or external speakers.

4. OPERATING INSTRUCTIONS

4.1. Using the Touchpad

The precision touchpad supports multi-touch gestures:

- **Single Tap:** Left-click.
- **Two-Finger Tap:** Right-click.
- **Two-Finger Scroll:** Drag two fingers up or down to scroll.
- **Pinch-to-Zoom:** Pinch two fingers together or spread them apart to zoom in or out.

4.2. Fingerprint Scanner (Windows Hello)

The built-in fingerprint scanner allows for secure and quick login:

1. Navigate to *Settings > Accounts > Sign-in options* in Windows 11.
2. Under "Windows Hello Fingerprint," click **Set up**.
3. Follow the on-screen prompts to register your fingerprint. You may need to scan your finger multiple times from different angles.

4.3. Audio Settings (THX Audio)

Your laptop features stereo speakers tuned by THX Audio for enhanced sound quality. You can adjust audio settings via the Windows Sound settings or through any pre-installed THX audio control panel software.

- **Volume Control:** Use the function keys (Fn + Fx) or the volume icon in the Windows taskbar.
- **Sound Settings:** Right-click the speaker icon in the taskbar and select "Sound settings" to configure output devices, input devices, and sound effects.

4.4. Connecting to Wi-Fi and Bluetooth

- **Wi-Fi:** Click the Wi-Fi icon in the taskbar, select your desired network, enter the password if prompted, and click "Connect."
- **Bluetooth:** Go to *Settings > Bluetooth & devices*. Turn on Bluetooth, then click "Add device" to pair with Bluetooth headphones, speakers, or other peripherals.

5. MAINTENANCE

5.1. Cleaning the Laptop

- **Screen:** Use a soft, lint-free cloth specifically designed for electronics. Dampen it slightly with water or a screen cleaner solution. Do not spray liquid directly onto the screen.
- **Keyboard and Chassis:** Use a soft, dry cloth. For stubborn dirt, a slightly damp cloth with mild soap solution can be used, ensuring no liquid enters the device. Use compressed air to remove dust from between keys.
- **Ports:** Use compressed air to gently clear dust from ports. Avoid inserting objects into ports.

5.2. Battery Care

- Avoid fully discharging the battery frequently.
- Do not expose the laptop to extreme temperatures.
- If storing the laptop for an extended period, charge the battery to about 50-60% before storage.

5.3. Software Updates

Regularly update your Windows operating system and device drivers to ensure optimal performance and security. You can check for updates via *Settings > Windows Update*.

6. TROUBLESHOOTING

6.1. Common Issues and Solutions

Problem	Possible Solution
Laptop does not power on.	Ensure the AC adapter is securely connected and the power outlet is working. Try a different outlet. If the battery is completely drained, it may take a few minutes of charging before the laptop can power on.
Wi-Fi connection issues.	Check if Wi-Fi is enabled in Windows settings. Restart your router and modem. Ensure you are within range of the Wi-Fi signal. Try forgetting the network and reconnecting.
Slow performance.	Close unnecessary applications. Check Task Manager for high CPU/RAM usage. Ensure Windows and drivers are up to date. Run a disk cleanup. Consider uninstalling unused programs.
Screen is blank or flickering.	Restart the laptop. Check display cable connections if using an external monitor. Update graphics drivers. Adjust display resolution.
Fingerprint scanner not working.	Ensure your finger is clean and dry. Re-register your fingerprint in Windows Hello settings. Check for driver updates for the fingerprint sensor.

If you encounter persistent issues not covered here, please refer to the support section or contact Gateway customer service.
