GIVERARE TSA-551

GIVERARE TSA-551 3-Digit Combination Travel Luggage Locks Instruction Manual

INTRODUCTION

This manual provides instructions for the GIVERARE TSA-551 3-Digit Combination Travel Luggage Locks. These locks are designed to secure luggage and other items, featuring a 3-digit resettable combination and TSA approval for airport security inspections.

SETUP: SETTING YOUR COMBINATION

The lock is preset to open at 0-0-0. To set your personal combination, follow these steps:

HOW TO USE & SET NEW COMBINATION

1. The original is 0-0-0, align the dials exactly to 0-0-0 in the windows on the side.

2. Pull up the shackle to open and rotate the shackle 90° counterclockwise.

3. Press down the shackle to make the small hook on the bottom of the shackle enter into the hole, rotate another 45° counterclockwise to hold on the hook.

4. Set your own combination, rotate and pull up the shackle back to lock, scramble the dials.

Note: When setting your own combination, please align the desired number exactly with the arrows.

Image: Steps for setting a new combination on the GIVERARE TSA-551 lock.

1. Ensure the lock is set to the original combination (0-0-0) and the dials are aligned exactly with the indicator marks on the side.
2. Pull up the shackle to open the lock.
3. Rotate the shackle 90 degrees counter-clockwise. Press down the shackle firmly until the small hook on the bottom of the shackle enters the hole.
4. While holding the shackle down, rotate it another 45 degrees counter-clockwise to hold it in place.
5. Set your desired 3-digit combination by rotating the dials. Ensure the numbers are aligned with the indicator marks.
6. Once your new combination is set, pull up the shackle to release it from the pressed-down position. Rotate the shackle back to its original closed position.
7. Scramble the dials to lock the device. Your new combination is now set.

Note: When setting your own combination, please align the desired numbers exactly with the arrows or indicator marks.

OPERATING THE LOCK

To open the lock, rotate the dials to your set 3-digit combination and pull up the shackle. To close the lock, press the shackle down into the lock body and scramble the dials to secure it.

TSA Inspection Feature

These locks are TSA (Transportation Security Administration) approved. This means TSA screeners can open your luggage for inspection without damaging the lock, using a special key. After inspection, the TSA agent will re-lock your baggage. This feature allows for international travel through over 750 airports without concerns about lock damage during security checks.

CARE AND MAINTENANCE

The GIVERARE TSA-551 locks are constructed with a zinc alloy body and hardened steel shackle, designed for durability and resistance to rust and corrosion. To ensure optimal performance and longevity:

- Keep the lock clean and free from excessive dirt or debris.
- Avoid exposing the lock to harsh chemicals or extreme temperatures for prolonged periods.
- While designed to be waterproof, it is advisable to wipe the lock dry if it becomes wet to prevent water spots or mineral buildup.
- Periodically check the dials for smooth operation. If they become stiff, a small amount of graphite lubricant can be applied.

TROUBLESHOOTING

- **Difficulty Setting New Combination:**

Ensure the shackle is fully pressed down and rotated correctly during the combination setting process. If the shackle is not properly engaged in the setting mechanism, the combination will not set. Double-check that the numbers are precisely aligned with the indicator marks when setting.

- **Lock Not Opening with Correct Combination:**

Verify that the numbers are perfectly aligned with the indicator marks. Sometimes, slight misalignment can prevent the lock from opening. If you have forgotten your combination, there is no master key for user-set combinations; the lock would need to be cut or replaced.

- **Dials are Stiff or Hard to Turn:**

Clean any visible dirt or lint from around the dials. A small amount of dry lubricant (like graphite powder) can be applied to the dial mechanism to improve smoothness. Avoid using oil-based lubricants as they can attract more dirt.

PRODUCT SPECIFICATIONS

COMPACT SIZE & LIGHT WEIGHT

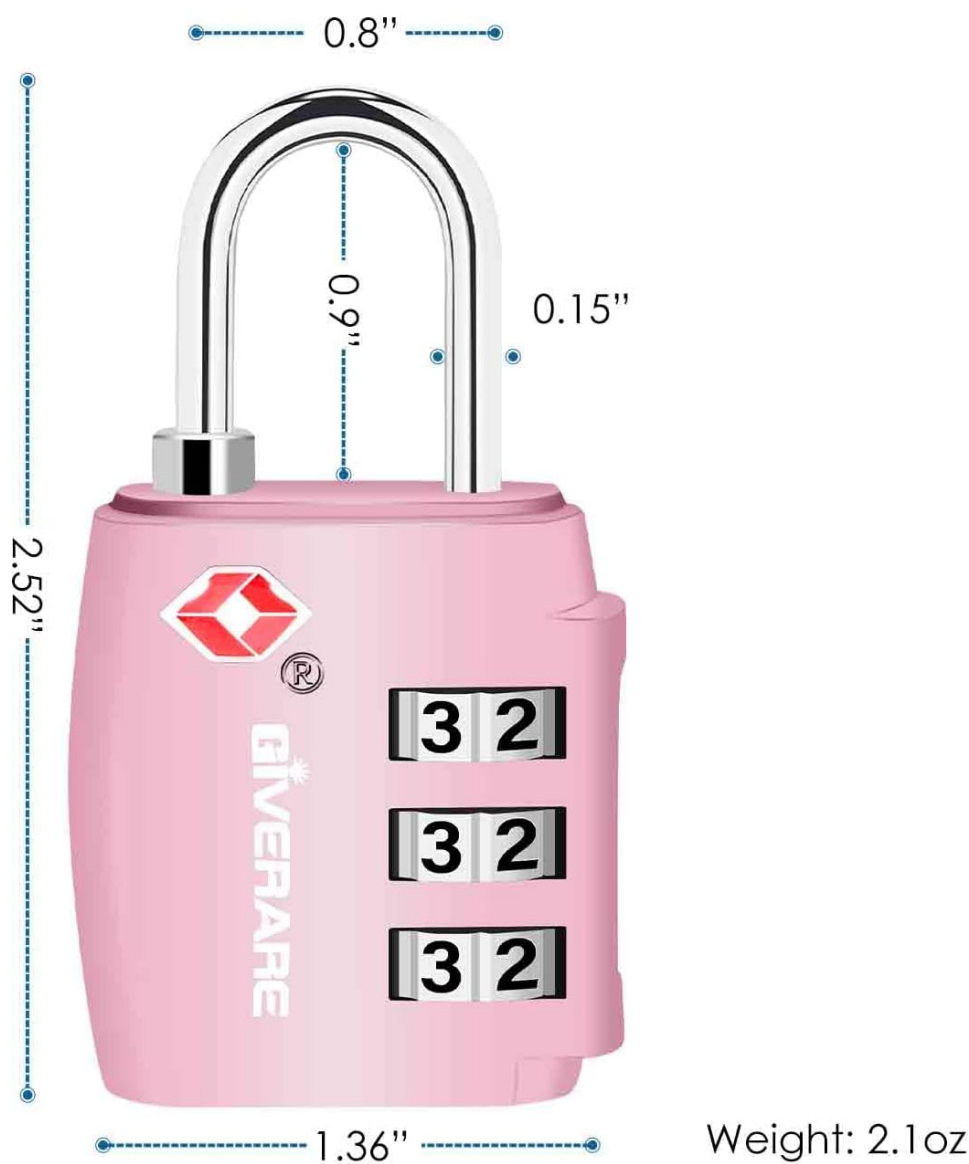

Image: GIVERARE TSA-551 Lock Dimensions.

Feature	Detail
Brand	GIVERARE
Model Name	TSA-551
Lock Type	3-Digit Combination Lock
Material	Zinc Alloy, Copper, Hardened Steel
