- **Regular Cleaning:** Clean the bathtub regularly with a soft cloth and a mild, non-abrasive cleaner. Avoid harsh chemicals, abrasive pads, or scouring powders, as these can damage the acrylic finish.

- **Avoid Sharp Objects:** Do not use sharp objects inside the tub, as they can scratch the surface.
- **Prevent Discoloration:** Avoid leaving items like hair dyes or strong chemicals in direct contact with the tub surface for extended periods.

## TROUBLESHOOTING

If you encounter any issues with your bathtub, refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
<b>Slow Drainage</b>	Hair or debris obstructing the drain.	Remove the drain stopper and clear any obstructions. Use a drain snake if necessary.
<b>Water Leakage</b>	Loose drain connections or insufficient sealant.	Check all plumbing connections under the tub and tighten if loose. Reapply silicone sealant if needed. If the leak persists, contact a professional plumber.
<b>Scratches on Surface</b>	Abrasive cleaning or sharp objects.	For minor scratches, specialized acrylic repair kits may be used. Prevent future scratches by using soft cleaning materials and avoiding sharp objects.
