3. SETUP AND ASSEMBLY INSTRUCTIONS

Follow these steps to assemble your balloon garland arch:

1. **Prepare Balloons:** Inflate the latex balloons using a balloon pump (not included). Inflate balloons to various sizes to create a dynamic and full arch. Avoid over-inflating to prevent bursting.
2. **Attach Balloons to Strip Tape:** The balloon strip tape has small holes. Insert the tied necks of the inflated balloons into these holes, alternating colors and sizes for a balanced look. Start with larger balloons and fill in gaps with smaller ones.
3. **Shape the Arch:** Once a significant portion of balloons are attached to the strip tape, begin to shape it into your desired arch or garland form. You may need to secure the strip tape to a wall or frame using additional adhesive or hooks (not included).
4. **Add Smaller Balloons and Silver Accents:** Use the provided glue dots to attach smaller balloons (5-inch) and

silver balloons to fill in any gaps and add depth to your garland. Press the glue dot onto the balloon, then firmly attach it to another balloon or the strip tape.

5. **Use Ribbon:** The balloon ribbon can be used to tie balloons together, create small clusters, or hang additional decorations.

Image 3.2: An example of the balloon garland arch used as a decorative backdrop for a gender reveal event, featuring pink and blue balloons with silver accents.

4. MAINTENANCE AND CARE

- **Storage:** Store uninflated balloons in a cool, dry place away from direct sunlight and sharp objects.
- **Inflation:** Use a hand pump or electric pump for inflation. Do not inflate balloons by mouth as this can introduce moisture and reduce their lifespan.
- **Temperature:** Extreme temperatures can affect balloons. Cold temperatures may cause them to deflate slightly, while hot temperatures can cause them to expand and burst. Keep assembled garlands in a moderate environment.
- **Disposal:** Dispose of deflated or burst balloons responsibly.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Balloons are popping easily.	Over-inflation, sharp objects, or extreme heat.	Inflate balloons to a slightly smaller size. Ensure the area is clear of sharp objects. Avoid direct sunlight or very hot environments.
Balloons are deflating quickly.	Improperly tied knots, small punctures, or cold temperatures.	Ensure knots are tied securely. Check for any small holes. Move the garland to a warmer environment if exposed to cold.
Garland is not holding shape.	Insufficient balloons, improper attachment to strip, or lack of support.	Add more balloons to fill gaps. Ensure balloons are firmly secured in the strip tape. Use additional anchors or a sturdy frame to support the garland.

6. SPECIFICATIONS
