Note: It is recommended to assemble the bed with two people to ensure stability and ease of construction. Do not fully tighten all fasteners until the entire frame is assembled and aligned.

OPERATING INSTRUCTIONS

The LITFAD platform bed is designed to support a mattress directly on its wooden slats, eliminating the need for a box spring.

Mattress Placement:

1. Ensure the bed frame is fully assembled and all fasteners are securely tightened.
2. Carefully place your California King size mattress onto the wooden slats.
3. Distribute the mattress evenly across the frame.

The sturdy structure and wooden slat system provide a maximum load capacity of 1200 lbs. Do not exceed this weight limit to maintain the integrity of the bed frame.

MAINTENANCE

Regular maintenance will help prolong the life and appearance of your LITFAD Pine Wood Platform Bed.

Cleaning:

- Wipe the wood surfaces with a soft, damp cloth.
- Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the natural wood finish.
- Dry immediately with a clean, soft cloth.

Structural Care:

- Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary to prevent wobbling or squeaking.
- Avoid dragging the bed frame when moving it; lift it to prevent stress on the joints.

TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed frame wobbles or feels unstable.	Loose fasteners. Uneven floor.	Check and tighten all bolts and screws. Ensure the bed is on a level surface.
Squeaking noises.	Loose joints. Friction between wood components.	Tighten all fasteners. Apply a small amount of paraffin wax or silicone spray to contact points between slats and frame if necessary.
Slats appear to shift or fall out.	Improper slat placement. Excessive movement.	Ensure slats are correctly seated in their designated slots or supports. Avoid jumping on the bed.
