BabyBond Y06 3-in-1 Baby Bassinet Instruction Manual

Model: Y06

1. Product Overview

The BabyBond Y06 Bassinet is designed to provide a safe and comfortable sleeping environment for infants. This versatile product functions as a standalone crib, a bedside sleeper, and offers a higher position for easier access to older infants. It features adjustable height settings, an anti-reflux angle, and breathable mesh sides for optimal airflow and visibility.

Key Features:

- **3-in-1 Functionality:** Serves as a crib and bedside bed for infants 0-6 months, and a versatile access mode for infants 6-12 months.
- **Adjustable Height:** 6 height settings to align with various adult bed heights (23 to 28 inches).
- **Anti-Reflux Angle:** Adjustable 3-7° angle to help prevent infant reflux.
- **Breathable Mesh:** 4-sided mesh design promotes air circulation and allows for easy observation of the baby.
- **Washable Mattress & Sheet:** Includes a double-sided sheet with a rayon air layer fabric and a waterproof fabric side. The fabric cover is removable and machine washable.
- **Stability & Safety:** Features an 8-foot design with an extra-wide bottom bracket and V-structure for enhanced stability. Meets ASTM and CPSIA safety standards.
- **Portability:** Equipped with four movable wheels for easy relocation, with a locking mechanism for security.
- **Storage:** Integrated large-capacity storage rack underneath for baby essentials.

2. Important Safety Information

Please read and understand all instructions before assembly and use of the BabyBond Y06 Bassinet. Failure to follow these instructions could result in serious injury or death.

- **Age and Weight Limits:** This bassinet is intended for infants from birth up to 6 months, or until the infant begins to push up on hands and knees, whichever comes first. The higher access mode is suitable for infants 6-12 months.
- **Assembly:** Ensure all parts are correctly assembled and securely fastened before each use. Do not use the bassinet if any parts are missing, damaged, or broken.
- **Sleeping Environment:** Always place your baby on their back to sleep. Use only the mattress provided by the manufacturer. Never add extra pillows, blankets, or padding under or over the infant, as this can cause suffocation.
- **Placement:** Always place the bassinet on a firm, flat, and level surface. Keep the bassinet away from cords, blinds,

drapes, heaters, and other potential hazards.

- **Bedside Sleeper Mode:** When used as a bedside sleeper, ensure the bassinet is securely attached to the adult bed using the provided fixing straps. The bassinet mattress must be level with the adult mattress.
- **Supervision:** Never leave your child unattended in the bassinet.
- **Wheels:** Always lock the wheels when the bassinet is stationary or when the baby is inside.

4. Assembly Instructions

The BabyBond Y06 Bassinet is designed for quick and tool-free assembly. Follow these steps carefully:

1. **Attach Wheels:** Insert each of the four wheels into the designated slots at the bottom of the bassinet frame legs until they click securely into place. Ensure all wheels are firmly attached.
2. **Assemble Frame:** Unfold the main bassinet frame. Ensure all locking mechanisms engage to form a stable base.
3. **Attach Bassinet Fabric Body:** Slide the fabric body onto the frame, ensuring the mesh sides are correctly oriented. Secure the fabric to the frame using the integrated fasteners (zippers, buckles, or snaps) as indicated in the diagrams.
4. **Insert Mattress and Sheet:** Place the mattress into the bassinet. Cover the mattress with the double-sided fitted sheet, ensuring it fits snugly.
5. **Attach Storage Rack:** Hook or slide the storage rack onto the lower part of the bassinet frame, ensuring it is stable and level.
6. **Final Check:** Before placing your baby in the bassinet, double-check all connections, locks, and fasteners to ensure they are secure.

5. Operating Instructions

5.1. 3-in-1 Modes

- **Standalone Crib (0-6 months):** Use the bassinet independently in any room. Ensure wheels are locked when stationary.
- **Bedside Sleeper (0-6 months):** Position the bassinet next to your adult bed. Lower one side of the bassinet (if applicable, refer to specific mechanism) and use the provided fixing straps to securely attach the bassinet to your bed frame. Ensure there is no gap between the bassinet and the adult mattress.
- **Higher Access Mode (6-12 months):** For older infants who are not yet able to climb out, the bassinet can be adjusted to a higher position for easier access, such as for diaper changes or comforting. Always ensure the baby is within the recommended age/weight limits and cannot climb out.

5.2. Height Adjustment

The bassinet offers 6 height adjustment levels to match various adult bed heights, typically ranging from 23 to 28 inches. To adjust the height:

1. Locate the height adjustment buttons or levers on each side of the bassinet frame.
2. Simultaneously press the buttons/levers and raise or lower the bassinet to the desired height.
3. Release the buttons/levers and ensure both sides are locked into the same height setting.

5.3. Angle Adjustment (Anti-Reflux)

The bassinet can be tilted at a 3-7° angle to assist with infant reflux. To adjust the angle:

1. Adjust one side of the bassinet to a higher setting than the other, creating a gentle incline.
2. Ensure the incline is within the recommended 3-7° range and that the baby's head is elevated.

incline for anti-reflux positioning.

5.4. Using Wheels and Bedside Attachment

- **Moving the Bassinet:** Unlock the wheels by pressing the brake levers. Carefully push the bassinet to its new location.
- **Securing the Bassinet:** Once in position, press down on the brake levers of all four wheels to lock them, preventing unintended movement.
- **Bedside Fixing Straps:** For bedside sleeper mode, thread the provided straps under your adult mattress and through the designated loops on the bassinet frame. Tighten the straps to pull the bassinet firmly against your bed, eliminating any gaps.

6. Care and Maintenance

Regular cleaning and maintenance will ensure the longevity and hygiene of your BabyBond Bassinet.

- **Fabric Cover:** The entire fabric cover of the bassinet is removable and machine washable. Use a gentle cycle with cold water and mild detergent. Do not bleach. Air dry or tumble dry on low heat.
- **Mattress:** The mattress itself should only be air-dried. The double-sided sheet is washable. Regularly check the mattress for any signs of wear or damage.
- **Frame:** Wipe the metal frame with a damp cloth and mild soap. Dry thoroughly.
- **Wheels:** Periodically check the wheels for debris and ensure they roll smoothly and lock effectively.
- **Storage:** When not in use, store the bassinet in a clean, dry place, away from direct sunlight and extreme temperatures.

7. Troubleshooting

If you encounter any issues with your BabyBond Bassinet, refer to the following common solutions:

- **Bassinet feels unstable:** Ensure all frame connections are fully engaged and locked. Check that the wheels are securely attached and locked when stationary. Verify the V-structure base is properly extended.
- **Height adjustment not working:** Ensure both adjustment buttons/levers are pressed simultaneously and released only when the desired height is reached and locked into place. Check for any obstructions.
- **Difficulty attaching to adult bed:** Ensure the bedside fixing straps are correctly threaded and tightened. There should be no gap between the bassinet and the adult mattress.
- **Wheels not rolling smoothly:** Check for any debris (lint, hair) caught in the wheel mechanisms. Clean as necessary. Ensure the wheel locks are disengaged.
- **Fabric cover difficult to remove/attach:** Ensure all zippers, snaps, or buckles are fully unfastened before removal and properly aligned before re-fastening.

If the issue persists, please contact BabyBond customer support for further assistance.
