Maintenance

Cleaning Your Smartwatch

Regular cleaning helps maintain the performance and appearance of your KOSPET TANK T2 Smartwatch:

- Wipe the watch screen and body with a soft, lint-free cloth. If necessary, slightly dampen the cloth with water.
- For the watch strap, clean with a mild soap solution and rinse thoroughly. Ensure the strap is completely dry before reattaching to the watch.
- Avoid using harsh chemicals, abrasive cleaners, or solvents as they may damage the watch's finish or internal components.

Water Resistance

The KOSPET TANK T2 Smartwatch is designed with water resistance. Refer to the specifications section for the exact water resistance rating. While it can withstand splashes and brief immersion, it is not recommended for hot showers, saunas, or diving, as steam and high pressure can compromise the seals.

Battery Care

- Charge the watch using only the provided charging cable.
- Avoid exposing the watch to extreme temperatures (hot or cold) as this can affect battery life and performance.
- If storing the watch for an extended period, charge it to approximately 50% to prevent deep discharge.
