### OPERATING INSTRUCTIONS

The Daiso Japan Ear Buds are designed for gentle cleaning and application. They feature a 2-way design, typically with one pointed end and one rounded end, offering versatility.

- For External Ear Cleaning:** Gently use the cotton tip to clean the outer ear and around the earlobe. Avoid inserting the ear bud deep into the ear canal.
- For Application:** Use the cotton tip to apply ointments, creams, or remove makeup from delicate areas.

3. **2-Way Design:** Utilize the specific tip shape (e.g., pointed for precision, rounded for broader application) as required for your task.

**Important Safety Note:** Do not insert the ear bud into the ear canal. Improper use can cause injury or push earwax deeper into the ear, leading to blockages or hearing issues. Consult a medical professional for earwax removal.
