Lionelo LOC-FIDI FREE WHITE

Fidi Free Electric Breast Pump User Manual

Brand: Lionelo | **Model:** LOC-FIDI FREE WHITE

1. INTRODUCTION

The Lionelo Fidi Free Electric Breast Pump is designed for convenience and efficiency, offering a hands-free and discreet pumping experience. Its quiet operation and portable design allow for use anytime, anywhere, without disturbing others. This manual provides essential information for the safe and effective use of your breast pump.

2. SAFETY INFORMATION

Please read all safety instructions carefully before using the device. Failure to follow these instructions may result in injury or damage to the product.

- Ensure all components are clean and sterilized before each use.
- The funnels are made of skin-friendly silicone, intended for contact with food.
- Do not immerse the main pump unit in water or other liquids.
- Keep out of reach of children.
- Use only the provided USB cable for charging.
- Do not use the device if any part is damaged.
- This product meets the required European standards for safety and hygiene.

3. PRODUCT COMPONENTS

The Fidi Free Electric Breast Pump package includes the following items:

- Breast pump main unit
- Milk bottle (1 pc, 150 ml) with matching teat
- Milk storage bags (2x)
- Cotton bag for storing the breast pump (20x30 cm)
- USB charging cable
- Funnels (1x)
- Funnel lid (1x)

● 3 SIZES OF FUNNELS INCLUDED

Image: The three included funnel sizes (17mm, 21mm, 25mm) for optimal comfort and fit.

4. SETUP

4.1 Assembly

Follow these steps to assemble your breast pump before first use:

1. Ensure all parts are clean and sterilized according to the Maintenance section.
2. Attach the appropriate size funnel to the main pump unit. Ensure it is securely fitted.
3. Connect the milk collection bottle to the bottom of the pump unit.
4. Place the funnel lid on top of the funnel if not in use or for storage.

4.2 Charging the Device

Before first use, fully charge the breast pump. The integrated LEDs will indicate the charging status.

- Connect the USB cable to the charging port on the pump unit.
- Plug the other end of the USB cable into a compatible USB power adapter (not included).
- The LEDs will illuminate to show charging progress.
- A full charge provides a full day's use.

5. OPERATING INSTRUCTIONS

The Fidi Free Electric Breast Pump features two working modes and multiple intensity levels for comfortable and efficient milk expression.

5.1 Powering On/Off

- To turn on, press and hold the power button. The LEDs will light up.
- To turn off, press and hold the power button again.

5.2 Working Modes and Intensity Levels

The device offers two distinct working modes, each with 5 intensity levels:

- **Massage Mode:** This mode mimics a baby's initial rapid suckling to stimulate milk let-down. Use this mode to initiate pumping.
- **Milk Expression Mode:** Once milk flow begins, switch to this mode for steady and efficient milk extraction. This mode simulates a baby's deeper, slower suckling.

Use the '+' and '-' buttons to adjust the intensity level within each mode. Start with a lower intensity and gradually increase to a comfortable level.

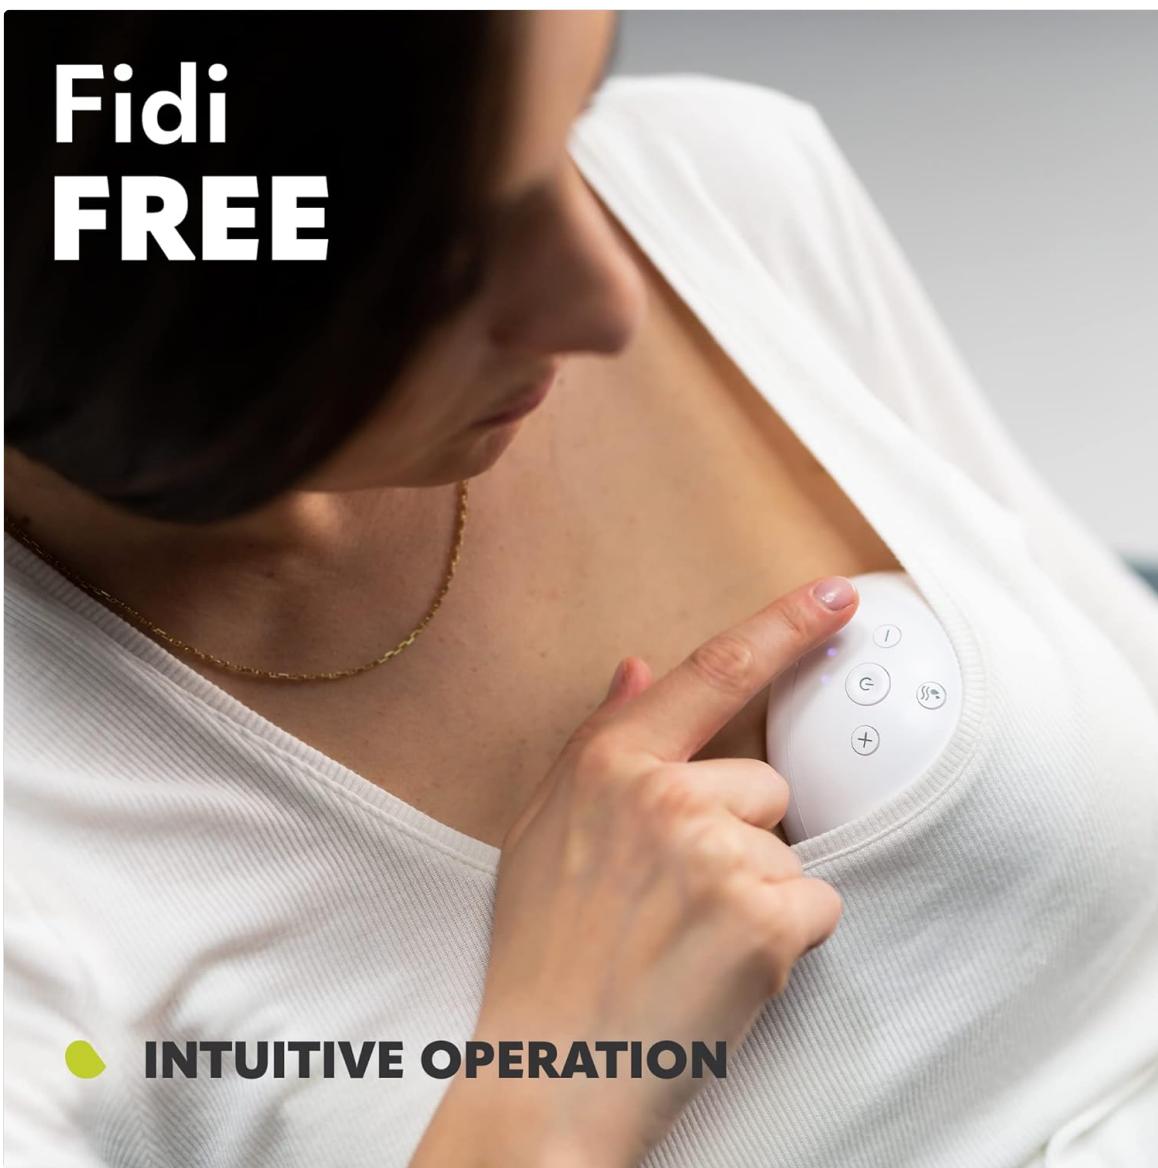

Image: The breast pump being used hands-free and discreetly, showing the intuitive button controls.

5.3 Timer Function

The breast pump is equipped with a timer and will automatically turn off after 30 minutes of continuous

operation. This feature helps prevent over-pumping and conserves battery life.

6. MAINTENANCE AND CLEANING

Proper cleaning and sterilization are crucial for hygiene and the longevity of your breast pump.

6.1 Disassembly for Cleaning

Before cleaning, ensure the device is turned off and unplugged. Carefully disassemble all parts that come into contact with breast milk: the funnel, milk collection bottle, and any other removable silicone components.

6.2 Cleaning Instructions

- Wash all disassembled parts (except the main pump unit) with warm soapy water immediately after each use.
- Rinse thoroughly with clean water.
- Do not use abrasive cleaners or harsh chemicals.
- The main pump unit should be wiped clean with a damp cloth only. Do not submerge it in water.

6.3 Sterilization

Silicone parts and the milk container can be sterilized at a temperature of 100°C (212°F). This can be done using a steam sterilizer, boiling water, or a microwave sterilizer according to the sterilizer's instructions.

● STERILIZABLE

Image: An exploded view demonstrating the sterilizable components of the breast pump, including the funnel and milk collection parts.

7. TROUBLESHOOTING

If you encounter any issues with your breast pump, refer to the table below for common problems and solutions.

Problem	Possible Cause	Solution
No suction or weak suction	Improper assembly; Damaged silicone parts; Low battery	Check all connections are secure; Inspect silicone parts for tears and replace if necessary; Charge the battery fully.
Pump not turning on	Battery is depleted; Device malfunction	Charge the breast pump; If still not working, contact customer support.
Uncomfortable pumping experience	Incorrect funnel size; Intensity level too high	Ensure you are using the correct funnel size (17mm, 21mm, or 25mm); Reduce the intensity level.

Problem	Possible Cause	Solution
Milk leaking	Improper assembly; Damaged bottle or seal	Ensure bottle is securely attached and all seals are in place; Inspect bottle and seals for damage.

8. SPECIFICATIONS

Feature	Detail
