Simon Rack MADERCLICK CORNER 3/400 900

Simonrack Maderclick Corner Boltless Metal Shelf Instruction Manual

Model: MADERCLICK CORNER 3/400 900

1. INTRODUCTION

Thank you for choosing the Simonrack Maderclick Corner Boltless Metal Shelf. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new shelving unit. This corner shelf is designed for robust storage, featuring a boltless assembly system and durable materials.

ATRIBUTOS ÚNICOS

2. SAFETY INFORMATION

- Always assemble the shelf on a flat, stable surface.
- Ensure all components are securely fitted before loading the shelf.
- Do not exceed the maximum load capacity of 200 kg per shelf.
- Distribute weight evenly across each shelf to prevent instability.
- Keep children and pets away from the assembly area.
- Wear appropriate safety gear, such as gloves, during assembly to prevent cuts or pinches.
- Do not climb on the shelving unit.

3. PACKAGE CONTENTS

Verify that all parts are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- Vertical profiles (uprights)
- Horizontal stringers (beams)
- Wood shelves (3 units)
- Plastic feet (4 units)
- Assembly instructions

4. ASSEMBLY INSTRUCTIONS (SETUP)

This boltless shelving unit is designed for quick and easy assembly. Only a nylon hammer is required for proper installation of the shelf tabs.

1. **Prepare the Area:** Clear a flat, spacious area for assembly.
2. **Attach Plastic Feet:** Place the four plastic feet onto the bottom ends of the vertical profiles. These feet protect your floor from scratches.
3. **Assemble the Base Frame:** Connect the horizontal stringers to the vertical profiles to form the base frame. Ensure the tabs on the stringers are fully inserted into the slots on the profiles. Use a nylon hammer to gently tap them into place for a secure fit.
4. **Install First Shelf:** Place the first wood shelf onto the assembled base frame. Ensure it sits flush and securely.
5. **Add Intermediate Stringers:** Attach the next set of horizontal stringers at your desired height for the second shelf. The shelf height is adjustable, allowing for customization. The profiles can be mounted on both sides for different functionalities.
6. **Install Second Shelf:** Place the second wood shelf onto the intermediate stringers.
7. **Add Top Stringers and Third Shelf:** Repeat the process for the top set of stringers and the third wood shelf.
8. **Final Check:** Once all shelves are in place, ensure all connections are tight and the unit is stable. The shelf is designed to be stable without needing to be anchored to the wall.

5. USAGE GUIDELINES (OPERATING)

The Simonrack Maderclick Corner Shelf offers maximum versatility and robust storage.

- **Load Capacity:** Each shelf has a load capacity of 200 kg. This includes a 'flex point' feature, meaning the shelf will return to its original shape after the load is removed, ensuring longer durability.
- **Weight Distribution:** Always distribute items evenly across the shelf surface. Avoid concentrating heavy loads in one small area.
- **Adjustable Shelves:** The shelves can be adjusted to different heights to accommodate various item sizes.
- **Stability:** The design ensures the shelves are stable and do not wobble after assembly, eliminating the need for wall anchoring.

6. MAINTENANCE

To ensure the longevity and optimal performance of your Simonrack shelf, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the metal frame with a damp cloth and mild detergent. Dry thoroughly. For the wood shelves, use a dry or slightly damp cloth. Avoid abrasive cleaners.
- **Inspection:** Periodically check all connections to ensure they remain secure. Re-tap with a nylon hammer if any connections feel loose.
- **Load Management:** Always adhere to the specified load capacity per shelf. Overloading can compromise the shelf's structural integrity.
- **Environment:** While durable, avoid prolonged exposure to extreme moisture or corrosive substances to prevent damage to the metal and wood components.

7. TROUBLESHOOTING

If you encounter any issues during assembly or use, refer to the following common solutions:

- **Shelf is Wobbly:** Ensure all horizontal stringers are fully seated into the vertical profile slots. Use a nylon hammer

to tap them firmly into place. Check that the shelf is on a level surface.

- **Difficulty Inserting Stringers:** Ensure the tabs are aligned correctly with the slots. A gentle tap with a nylon hammer should help. Do not force components, as this may cause damage.
- **Missing Parts:** Double-check the packaging. If parts are genuinely missing, contact Simon Rack customer support with your purchase details.

8. PRODUCT SPECIFICATIONS

Brand	Simon Rack
Model	MADERCLICK CORNER 3/400 900
Material	Steel (DC 01, S325 profiles, Z275 galvanized coating), Wood (12mm chipboard shelves)
