Assembly of the Tribesigns Console Table is designed to be straightforward. All parts are letter-marked to correspond with the included assembly guide. Please follow the steps below and refer to the detailed diagrams in your physical assembly guide for best results.

- Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface (like a carpet) to prevent scratches. Identify each part using the provided labels (A, B, C, etc.) and compare them with the 'Package Contents' list.
- Assemble the Metal Frame:** Begin by connecting the metal leg frames (B) with the connecting metal bars (C) using the provided hardware (E) and installation tool (F). Ensure all connections are snug but do not overtighten until the frame is fully assembled.
- Attach the Tabletop:** Once the metal frame is stable, carefully place the tabletop (A) onto the assembled frame. Align the pre-drilled holes on the tabletop with the corresponding holes on the frame. Secure the tabletop to the frame using the remaining hardware (E). Tighten all screws firmly, but avoid excessive force.
- Install Adjustable Foot Pads:** Screw the adjustable foot pads (D) into the bottom of each leg. These pads help protect your floor and allow for minor height adjustments to ensure the table is level and stable on uneven surfaces.
- Final Check:** Double-check all connections to ensure they are tight and secure. Gently shake the table to confirm its stability.
