1. INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your Decool Scorpion 4WD Jeep Technique Series building toy, model 33002. Please read this manual thoroughly before beginning assembly to ensure correct construction and safe use of the product. This set contains 750 plastic pieces designed for an engaging building experience.

2. SAFETY INFORMATION

- **Choking Hazard:** This toy contains small parts and is not suitable for children under 3 years of age.
- Adult supervision is recommended during assembly and play, especially for younger children.
- Do not put pieces in mouth.
- Keep packaging materials away from children to prevent suffocation.
- Inspect all parts before assembly for any damage. Do not use damaged parts.

3. PACKAGE CONTENTS

Your Decool Scorpion 4WD Jeep Technique Series 33002 package should contain the following items:

- Approximately 750 x Plastic Building Pieces
- 1 x Instruction Manual (this document)

Note: Please verify all pieces are present before starting assembly. If any parts are missing or damaged,

refer to the "Warranty & Support" section for assistance.

4. ASSEMBLY INSTRUCTIONS

The Decool Scorpion 4WD Jeep Technique Series 33002 is a complex building set. Follow the step-by-step instructions provided in the included printed manual carefully for proper assembly.

1. **Preparation:** Unpack all pieces and organize them by type or color as suggested in the printed manual. Ensure you have a clean, well-lit workspace.
2. **Follow the Manual:** Refer to the dedicated instruction book for detailed, illustrated assembly steps. Each step will guide you on which pieces to use and how to connect them.
3. **Connect Pieces:** Firmly press pieces together until they are securely connected. Avoid forcing pieces if they do not fit, as this may cause damage.
4. **Check Progress:** Periodically review your progress against the manual's illustrations to ensure accuracy.
5. **Final Inspection:** Once assembly is complete, check all connections to ensure the model is sturdy and all parts are correctly placed.

Image: The fully assembled Decool Scorpion 4WD Jeep Technique Series 33002. This model features a robust black and red design, large off-road tires, a detailed engine hood, a sturdy front bumper, and roof-mounted auxiliary lights, along with a spare tire at the rear.

5. OPERATING INSTRUCTIONS

The Decool Scorpion 4WD Jeep Technique Series 33002 is a manual operation building toy. Once assembled, it can be used for display or imaginative play.

- **Manual Movement:** The vehicle is designed for manual pushing and pulling. Its wheels are free-rolling.
- **Steering:** If the model incorporates a steering mechanism, it will be operated manually by turning the steering wheel or a designated gear.
- **Interactive Features:** Any movable parts, such as doors, hood, or suspension, are designed for manual manipulation. Operate them gently to avoid damage.

Avoid operating the toy on rough surfaces that could cause excessive wear or damage to the plastic components.

6. MAINTENANCE

Proper care will extend the life and appearance of your Decool Scorpion 4WD Jeep Technique Series 33002.

- **Cleaning:** Wipe the model with a soft, dry cloth to remove dust. For stubborn dirt, use a slightly damp cloth with mild soap, then wipe dry immediately. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the assembled model or disassembled pieces in a cool, dry place away from direct sunlight and extreme temperatures to prevent material degradation or discoloration.
- **Inspection:** Periodically check for any loose or damaged parts. Reattach or replace as necessary.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Missing pieces upon unboxing.	Packaging error or loss during transit.	Contact Decool customer support with proof of purchase and a list of missing parts.
Parts do not fit together.	Incorrect orientation or wrong parts being used.	Refer to the instruction manual to ensure correct part selection and orientation. Do not force parts.
Assembled model is unstable.	Loose connections or incorrect assembly steps.	Review previous assembly steps to ensure all connections are firm and correct.
