MAINTENANCE

To ensure the longevity and appearance of your vidaXL bed frame, follow these maintenance guidelines:

- **Cleaning the Fabric:** For general cleaning, gently vacuum the upholstered fabric to remove dust and debris. For spills, blot immediately with a clean, dry cloth. For tougher stains, use a mild fabric cleaner following the product's instructions, testing on an inconspicuous area first. Do not use harsh chemicals or abrasive cleaners.
- **Frame Inspection:** Periodically check all bolts and connections to ensure they remain tight. Retighten if necessary to maintain stability and prevent squeaking.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause the fabric to fade.
- **Weight Distribution:** Ensure weight is evenly distributed across the bed frame to prevent stress on specific areas.

TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common problems and solutions:

• **Squeaking Noises:**

Solution: Check all bolts and connections. Tighten any loose fasteners. Ensure the support legs are firmly in contact with the floor. If the noise persists, try lubricating the connection points with a silicone spray or placing felt pads between metal-on-metal contact points.

• **Bed Frame Feels Unstable:**

Solution: Verify that all assembly steps were followed correctly and all hardware is securely tightened. Ensure the bed frame is on a level surface. Adjust the support legs if they are uneven.

• **Slats Sagging or Breaking:**

Solution: Ensure the mattress weight does not exceed the maximum capacity. Check if the center support beam is properly installed and supporting the slats. Replace any damaged slats immediately to prevent further issues.
