6. CARE AND MAINTENANCE

Regular care will help maintain the appearance and longevity of your cabinet.

- **Cleaning Wood Surfaces:** Wipe wood surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that can damage the finish. Dry immediately with a clean cloth.
- **Cleaning Glass Panels:** Use a standard glass cleaner and a soft, lint-free cloth to clean the glass panels. Spray cleaner onto the cloth, not directly onto the glass, to prevent liquid from seeping into wood joints.
- **Dusting:** Dust regularly with a soft, dry cloth.
- **Hardware Check:** Periodically check all screws and fasteners to ensure they are tight. Retighten if necessary.
- **Spills:** Wipe up spills immediately to prevent water damage or staining.

7. TROUBLESHOOTING

If you encounter any issues with your cabinet, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Cabinet is wobbly or unstable.	Loose fasteners; uneven floor.	Ensure all screws are tightened. Move the cabinet to a level surface or use shims under the legs to stabilize.
Doors do not close properly or are misaligned.	Hinges are loose or improperly adjusted.	Tighten hinge screws. Adjust hinge settings (if applicable) to align doors. Refer to hinge manufacturer's instructions for specific adjustment methods.
Scratches on wood surface.	Accidental damage during assembly or use.	For minor scratches, use a wood repair marker or furniture polish matching the cabinet's finish.
