2. SETUP

Before first use, wash all detachable parts (cups, lids, blade units) with warm soapy water. Ensure all parts are completely dry before assembly.

Assembly for Blending

1. Fill the desired cup (500ml travel bottle) with your ingredients. Do not exceed the MAX fill line.
2. Attach the 6-leaf blade unit to the open end of the cup. Turn clockwise to tighten securely.
3. Invert the assembled cup and blade unit, then place it onto the motor base. Turn clockwise to lock it into position. The red indicator light on the motor base will illuminate when correctly locked.

One-Button Operation, Free Your Hands

Assembly for Grinding

1. Fill the 300ml grinding cup with dry ingredients. Do not overfill.
2. Attach the 2-leaf blade unit to the open end of the grinding cup. Turn clockwise to tighten securely.
3. Invert the assembled cup and blade unit, then place it onto the motor base. Turn clockwise to lock it into position. The red indicator light on the motor base will illuminate when correctly locked.

3. OPERATING INSTRUCTIONS

Ensure the blender is properly assembled and locked onto the motor base before operation.

Blending Smoothies and Shakes

1. After assembly, press the ON/OFF button on the motor base. The blue indicator light will illuminate, and blending will begin.
2. Blend until desired consistency is achieved. For optimal results, blend in short pulses rather than continuous operation.
3. To stop, press the ON/OFF button again. The blue light will turn off.
4. Unlock the cup by turning it counter-clockwise and lift it from the base. Replace the blade unit with a spout lid or flat-top lid for drinking or storage.

Grinding Dry Ingredients

1. After assembling the grinding cup with the 2-leaf blade unit, press the ON/OFF button.
2. Grind in short bursts until the desired fineness is achieved.
3. To stop, press the ON/OFF button again.
4. Unlock the cup by turning it counter-clockwise and lift it from the base.

Important Notes:

- Do not operate the blender continuously for more than 1 minute. Allow a 2-minute rest period after each minute of continuous operation to prevent overheating.
- Ensure the motor base is on a stable, flat surface. The diamond-shaped base with 4 suction cups provides stability.
- Always ensure the blade unit is securely tightened before placing it on the motor base.

4. MAINTENANCE

Proper cleaning and maintenance will extend the life of your Acezoe Personal Blender.

Cleaning

1. Always unplug the motor base from the power outlet before cleaning.
2. Separate the cup, blade unit, and lids from the motor base.
3. The cups and lids are dishwasher safe.
4. The blade units can be rinsed directly under running water. Use the provided cleaning brush to safely remove any food residue from around the blades. Exercise caution when handling blade units as blades are sharp.
5. Wipe the motor base with a damp cloth. Never immerse the motor base in water or any other liquid.
6. Ensure all parts are completely dry before reassembling or storing.

5. TROUBLESHOOTING

If you encounter issues with your blender, please refer to the following common problems and solutions:

Blender Does Not Turn On

- Ensure the power cord is securely plugged into a working electrical outlet.
- Verify that the cup and blade unit are correctly assembled and locked onto the motor base. The red indicator light should be on.
- Check if the ON/OFF button has been pressed. The blue indicator light should illuminate during operation.

Ingredients Are Not Blending Smoothly

- Ensure there is enough liquid in the cup to allow ingredients to circulate.
- Cut larger ingredients into smaller pieces before blending.
- Do not overfill the cup.
- Use the pulse function for tough ingredients or to break up air pockets.

Blender Stops During Operation

- The blender may have overheated. Unplug the unit and let it cool down for at least 15-20 minutes before attempting to use it again.
- Check for any obstructions around the blade. Remove the cup, clear any blockages, and reassemble.

If the problem persists after trying these solutions, please contact customer support.

6. SPECIFICATIONS

Feature	Specification
Brand	Acezo
Model Number	SBL365AB
Power	850W
Capacity	2 x 500ml (Travel Bottles), 300ml (Grinding Cup)
Blade Material	Stainless Steel
Material Type Free	BPA Free
Control Type	One-Button Control
