

## Tru CB-100

# Tru Rapid Cold Brew Coffee Maker User Manual

MODEL: CB-100

## IMPORTANT SAFEGUARDS

---

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and/or injury to persons, including the following:

- Read all instructions before operating the appliance.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against electric shock, do not immerse cord, plugs, or the appliance in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner. Contact the manufacturer for examination, repair, or adjustment.
- The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.
- Do not use outdoors. This appliance is for household use only.
- Do not let the cord hang over the edge of a table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Always attach the plug to the appliance first, then plug the cord into the wall outlet. To disconnect, turn any control to 'off', then remove the plug from the wall outlet.
- Do not use the appliance for other than intended use.
- Ensure all food contact parts are made with BPA-free materials.
- This appliance uses a USB input with a 5V adapter and a 2-pin plug. Ensure proper power supply.

## PARTS IDENTIFICATION

---

Familiarize yourself with the components of your Tru Rapid Cold Brew Coffee Maker.

# TRULY SAFE

All food contact parts are made with BPA free materials.

5V, 4 Watts  
USB Adapter

Image: The Tru Rapid Cold Brew Coffee Maker disassembled, showing the main unit, lid with control panel, removable brew chamber, and dual mesh filters. A 5V, 4 Watts USB adapter is also shown.

- **Main Unit (Pitcher):** Holds the brewed cold brew concentrate. Features a brew window to observe the infusion process.
- **Lid with Control Panel:** Contains the power button, brew setting selector, and start button.
- **Removable Brew Chamber:** Where coffee grounds are placed for brewing.
- **Dual Mesh Filters:** Integrated within the brew chamber to ensure smooth extraction and prevent grounds from entering the concentrate.
- **Power Adapter:** USB input with 5V adapter and cord for power supply.

## SETUP

Before first use, ensure all parts are clean and dry.

### Initial Setup

1. **Unpack:** Carefully remove all components from the packaging.
2. **Clean:** Wash the removable brew chamber and dual mesh filters with warm, soapy water. Rinse thoroughly and dry. Wipe the exterior of the main unit with a damp cloth.

3. **Assemble:** Place the dual mesh filters into the removable brew chamber. Insert the brew chamber into the main unit.

Image: A hand holding the removable brew chamber, showing the coffee grounds placed inside the filter.

## OPERATING INSTRUCTIONS

---

Follow these steps to brew your cold brew coffee.

### Brewing Process

1. **Add Coffee Grounds:** Fill the removable brew chamber with your desired amount of coarse-ground coffee. Do not overfill.
2. **Place Brew Chamber:** Securely place the brew chamber with coffee grounds into the main unit.
3. **Add Water:** Pour cold, filtered water into the main unit, ensuring it covers the coffee grounds in the brew chamber. Do not exceed the MAX fill line (500mL / 17 ounces).

Image: A hand pouring water into the main unit of the coffee maker, with the brew chamber already in place.

4. **Secure Lid:** Place the lid onto the main unit and twist to lock it in place.
5. **Connect Power:** Plug the USB power adapter into the appliance and then into a suitable 5V power source.

Image: A hand plugging the USB power cord into the side of the Tru Rapid Cold Brew Coffee Maker.

6. **Select Brew Setting:** Press the 'Brew Setting' button on the lid to cycle through the available options: Mild, Medium, or Bold. The indicator light will show the selected setting.
7. **Start Brewing:** Press the 'Start' button. The appliance will begin the rapid cold brewing process using patented vacuum technology. The brew window allows you to observe the infusion.

Image: A finger pressing the 'Start' button on the control panel located on the lid of the coffee maker.

8. **Brew Completion:** Brewing typically takes as little as 5 minutes, depending on the selected strength. The appliance will indicate when brewing is complete.
9. **Serve:** Once brewing is complete, remove the lid and brew chamber. Pour the cold brew concentrate into a glass with ice. Dilute with water or milk to your preference.

Image: Cold brew coffee being poured from the Tru Rapid Cold Brew Coffee Maker into a tall glass filled with ice.

## Brew Settings

The Tru Rapid Cold Brew Coffee Maker offers three brew strength settings:

- **Mild:** For a lighter, smoother cold brew.
- **Medium:** A balanced strength, suitable for most preferences.
- **Bold:** For a stronger, more intense cold brew concentrate.

## CLEANING AND MAINTENANCE

---

Regular cleaning ensures optimal performance and longevity of your coffee maker.

- **Unplug:** Always unplug the appliance from the power source before cleaning.
- **Disassemble:** Remove the lid and the brew chamber from the main unit. Discard used coffee grounds.
- **Wash Removable Parts:** Wash the brew chamber and dual mesh filters with warm, soapy water. Use a soft brush if necessary to remove any coffee residue. Rinse thoroughly.
- **Clean Main Unit:** Wipe the interior and exterior of the main unit with a damp cloth. Do not immerse the main unit or the lid (which contains electrical components) in water.

- **Dry:** Ensure all parts are completely dry before reassembling or storing.
- **Storage:** Store the appliance in a clean, dry place when not in use.

## TROUBLESHOOTING

If you encounter any issues, refer to the following table for common problems and solutions.

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in correctly; Power adapter issue.	Ensure the USB adapter is securely plugged into both the appliance and a working 5V power source. Check the power outlet.
Coffee is too weak/strong.	Incorrect brew setting; Insufficient/excessive coffee grounds; Grind size.	Adjust the brew setting (Mild, Medium, Bold). Adjust the amount of coffee grounds. Ensure coffee grounds are coarse.
Brewing takes longer than expected.	Fine coffee grounds; Overfilled brew chamber.	Use coarse-ground coffee. Do not overfill the brew chamber.
Coffee grounds in concentrate.	Brew chamber not properly seated; Damaged filter.	Ensure the brew chamber is correctly assembled and seated. Inspect dual mesh filters for damage.

## SPECIFICATIONS

Detailed technical specifications for the Tru Rapid Cold Brew Coffee Maker.

Feature	Specification
Brand	Tru
Model Name	TRU Rapid Cold Brew Coffee Maker
Model Number	CB-100
Color	Black
Product Dimensions	5.51"D x 7.28"W x 7.01"H
Item Weight	2.25 pounds
Capacity	17 ounces (500mL)
Special Features	Rapid Cold Brewing, Patented Vacuum Technology, Removable Brew Chamber, 3 Brew Settings
Coffee Maker Type	Drip Coffee Machine

Feature	Specification
Operation Mode	Fully Automatic
Voltage	120 Volts
Power Input	USB input with 5V adapter, 4 Watts
Coffee Input Type	Ground Coffee
