BRITA Marella XL Water Filter Jug User Manual

Model: 129064

1. INTRODUCTION

The BRITA Marella XL Water Filter Jug is designed to provide you with purer, great-tasting tap water. It effectively reduces limescale, chlorine, certain impurities, and metals, enhancing the flavor of your cold and hot beverages. This manual provides essential information on setting up, operating, maintaining, and troubleshooting your BRITA Marella XL jug.

2. SETUP

2.1 Initial Cleaning

Before first use, wash all components of the BRITA Marella XL jug (except the BRITA Memo lid) in warm soapy water or in a dishwasher. Rinse thoroughly.

2.2 Preparing the MAXTRA PRO Filter

1. Unwrap the MAXTRA PRO filter cartridge.
2. Submerge the filter in cold water and shake gently to remove any air bubbles. This primes the filter for optimal performance.

2.3 Inserting the Filter

1. Place the funnel inside the jug.
2. Insert the prepared MAXTRA PRO filter into the funnel, pressing it down firmly until it clicks into place. Ensure a snug fit to prevent unfiltered water from bypassing the filter.

2.4 First Use

Fill the jug with tap water. Discard the first two fillings of filtered water. These initial filtrations help to rinse the filter and prepare it for regular use. The third filling is ready for consumption.

3. OPERATING

3.1 Filling the Carafe

To fill the jug, simply open the flip-top lid and place it under the tap. The water will flow through the MAXTRA PRO filter into the main reservoir. The Marella XL is designed to fit conveniently in most refrigerator doors.

De waterfilterkan voor je dagelijkse gemak.

3.2 BRITA Memo Digital Indicator

The BRITA Memo on the lid tracks the time since the last filter change. It will indicate when it's time to replace the MAXTRA PRO filter cartridge, typically every 4 weeks or after filtering 150 liters of water, whichever comes first. Press the START button on the Memo for a few seconds after each filter change to reset it.

3.3 Benefits of Filtered Water

Using the BRITA Marella XL provides water with a purer, cleaner taste by reducing substances like chlorine, limescale, certain pesticides, herbicides, pharmaceutical residues, and metals such as lead and copper. This improves the taste of drinking water and extends the life of your appliances by preventing limescale buildup.

Voor alle water- liefhebbers!

Zachter, schoner
water met een
pure smaak.

4. MAINTENANCE

4.1 Cleaning the Jug

The BRITA Marella XL jug (excluding the BRITA Memo lid) is dishwasher safe. For manual cleaning, use warm water and a mild detergent. Ensure all parts are thoroughly rinsed before reassembly.

4.2 Filter Replacement

Replace the MAXTRA PRO filter cartridge every 4 weeks or after filtering 150 liters of water to ensure optimal performance and water quality. Follow the steps in Section 2.2 and 2.3 for preparing and inserting the new filter.

4.3 Filter Recycling

BRITA MAXTRA PRO filter cartridges are recyclable. Please return used filters to a participating BRITA collection point. This contributes to reducing plastic waste and supports sustainable practices.

1 filter, 4 weken: 150L pure smaak.

Image: A glass of clear, filtered water, with text indicating that one filter provides 150 liters of pure-tasting water and is made with 50% bio-based plastic.

5. TROUBLESHOOTING

- **Slow Filtration:** If water filters very slowly, the filter might be clogged. This can happen in areas with very hard water or high sediment. Try re-priming the filter (Section 2.2) or replace it if the issue persists.
- **BRITA Memo Not Working:** Ensure the Memo is dry and clean. If it doesn't reset or display correctly after pressing the START button, the battery might be depleted. The Memo unit is sealed and typically not user-replaceable; contact BRITA customer service if it fails within the warranty period.
- **Unpleasant Water Taste:** Ensure the filter is correctly installed and has been primed (first two fillings discarded). If the taste persists, the filter may be exhausted and needs replacement. Ensure you are using genuine BRITA MAXTRA PRO filters.

6. SPECIFICATIONS

Product Dimensions (L x W x H)	14.8 x 25.8 x 25.8 cm
Weight	990 grams

Manufacturer	Brita
Item Model Number	129064
Country of Origin	Germany
Material	Plastic
Capacity	3.5 Liters
Included Components	Marella Filter Jug + 1 Filter
Purification Method	Ion exchange pearls and activated carbon
Power Source	Non-electric

7. WARRANTY AND SUPPORT

The BRITA Marella XL Water Filter Jug comes with a 2-year availability for spare parts. For any questions, technical support, or warranty claims, please contact BRITA customer service. You can find contact information on the official BRITA website or through your local retailer.

Welke wordt de jouwe? Kies verstandig!

Hard water?
Deze filter
staat voor je
klaar!
