Safety Information

- **Maximum Load Capacity:** The chaise lounge is designed to support a maximum weight of 120 kg (264 lbs). Do not exceed this limit.
- **Folding Mechanism:** Always follow the instructions for safe operation of the folding (clic-clac) mechanism. Ensure hands and fingers are clear of moving parts during conversion.
- **Assembly:** Ensure all components are correctly assembled and tightened before use. Regularly check all fasteners to ensure they remain secure.
- **Stability:** Do not stand on the chaise lounge. Avoid sudden movements or excessive force that could compromise stability.
- **Children:** Keep children away from the folding mechanism during operation.

Package Contents

Verify that all components are present and undamaged before beginning assembly. If any parts are missing or damaged, please contact Vente-unique customer support.

- 1 x Penelope Chaise Lounge Frame
- 3 x Matching Cushions
- 4 x Wooden Legs
- Assembly Hardware (screws, washers, Allen key, if applicable)

Assembly Instructions

Assembly is required for this product. It is recommended to have two people for assembly. Clear a space and lay out all components before starting.

1. **Attach the Legs:** Carefully turn the chaise lounge frame upside down. Locate the pre-drilled holes on the underside of the frame. Attach each of the four wooden legs using the provided hardware. Ensure they are securely tightened.

Figure 2: Detail of the wooden leg. Attach securely to the frame.

2. **Position the Backrest:** Once the legs are attached, carefully turn the chaise lounge upright. The backrest typically

slots into pre-fitted guides on the main frame. Align the backrest with these guides and push down firmly until it clicks into place.

3. **Place Cushions:** Arrange the three matching cushions on the chaise lounge for comfort.
4. **Final Check:** Before use, gently test the stability of the chaise lounge and ensure all connections are firm.

Operating Instructions

Converting to a Sleeping Area (Clic-Clac Mechanism)

The Penelope chaise lounge features a clic-clac mechanism, allowing it to be easily converted into an auxiliary sleeping area.

1. **Clear the Area:** Ensure there is enough space behind the chaise lounge for the backrest to recline fully.
2. **Recline the Backrest:** Gently push the backrest forward until you hear a "clic" sound. Then, allow it to recline backward until it lies flat, forming a bed surface.
3. **Return to Seating Position:** To return to the seating position, lift the backrest until you hear two "clic" sounds. Then, gently push it back to its upright position.

Using the Integrated Storage Compartment

The chaise lounge includes a convenient storage compartment located beneath the seat.

1. **Access Storage:** Locate the fabric loop or handle at the front edge of the seat. Gently pull upwards on this loop to lift the seat section. The seat will pivot upwards, revealing the storage space.

Figure 3: The integrated storage compartment, ideal for storing cushions or blankets.

2. **Close Storage:** To close, gently lower the seat section until it rests securely back in place. Ensure it is fully closed before sitting or converting the chaise lounge.

Maintenance

- **Cleaning Fabric:** For general cleaning, gently vacuum the fabric to remove dust and debris. For spills or stains, spot clean immediately with a clean, damp cloth and mild soap. Blot the area; do not rub vigorously. Allow to air dry completely.
- **Cleaning Wooden Legs:** Wipe wooden legs with a soft, dry cloth. Avoid abrasive cleaners or excessive moisture.
- **Regular Checks:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading. Position the chaise lounge away from direct sunlight or use curtains/blinds.

Troubleshooting

Problem	Possible Cause	Solution
Chaise lounge feels unstable.	Loose legs or frame connections.	Check and tighten all leg and frame assembly screws. Ensure the backrest is fully engaged.
Difficulty converting to bed or back to seat.	Mechanism obstructed or not fully engaged.	Ensure no objects are obstructing the mechanism. Apply gentle, even pressure. Refer to "Operating Instructions" for correct procedure.
Storage compartment not closing properly.	Items inside are too tall or mechanism is misaligned.	Rearrange or remove items from the storage compartment. Gently guide the seat down, ensuring proper alignment.
