2. SAFETY INFORMATION

- **Age Recommendation:** This product is intended for ages 8 years and older. It contains small parts that may pose a choking hazard for younger children.
- **Small Parts:** Keep all small parts out of reach of children under 3 years of age.
- **Sharp Edges:** Exercise caution when cutting parts from the plastic runners, as some edges may be sharp. Use appropriate tools safely.
- **Material:** The models are made of plastic. Do not expose to extreme heat or open flames.
- **Ventilation:** If using paints or adhesives (not included), ensure adequate ventilation.

3. PACKAGE CONTENTS

Upon opening the package, please verify that all components are present. The set typically includes:

- Five (5) distinct Mobile Suit Gundam Mobile Suit Ensemble 15.5 model kits.

- Multiple plastic runners containing individual model parts for each Mobile Suit.
- Assembly instruction sheets/diagrams specific to each Mobile Suit model.
- Accessory parts (weapons, shields, etc.) for each Mobile Suit.

Note: Tools for assembly (e.g., nippers, hobby knife) are not included and must be acquired separately.

4. ASSEMBLY INSTRUCTIONS

Assembly is required for each Mobile Suit model. Follow the detailed diagrams provided in the individual instruction sheets included with each kit. The general steps are as follows:

1. **Preparation:** Lay out all parts for one Mobile Suit model. Identify the corresponding instruction sheet.
2. **Part Removal:** Carefully cut each part from its plastic runner using a hobby nipper. Avoid pulling or twisting parts, as this can cause damage.
3. **Clean Edges:** Use a hobby knife or sandpaper to gently trim any excess plastic (nubs) from the cut edges for a cleaner finish.
4. **Follow Diagrams:** Refer to the instruction diagrams step-by-step. Parts are typically numbered for easy identification.
5. **Snap-Fit Assembly:** Most parts are designed for snap-fit assembly. Apply gentle, even pressure to connect parts. Do not force them.
6. **Accessory Attachment:** Attach weapons, shields, and other accessories as indicated in the instructions.
7. **Completion:** Once all parts are assembled, your Mobile Suit model is ready for display. Repeat the process for the remaining four models.

For detailed visual guidance, always consult the specific assembly diagrams provided with each individual model kit.

5. OPERATING INSTRUCTIONS (POSING AND DISPLAY)

These models are designed for display and light posing. They do not require batteries or external power.

- **Posing:** The Mobile Suit figures feature articulated joints. Gently move the joints to achieve desired poses. Avoid excessive force to prevent breakage.
- **Accessory Use:** Attach and detach accessories carefully. Ensure they are securely fitted to prevent them from falling off.
- **Display:** Place your assembled models on a stable, flat surface away from direct sunlight, extreme temperatures, and high humidity to preserve their condition.

6. MAINTENANCE

- **Cleaning:** To clean your models, gently wipe them with a soft, dry cloth. For stubborn dust, a slightly damp cloth can be used, followed immediately by a dry cloth. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** When not on display, store models in a cool, dry place, preferably in their original packaging or a sealed container to protect them from dust and environmental factors.
- **Joint Care:** If joints become loose over time, a small amount of clear nail polish or hobby-grade joint tightener can be applied to the ball joint and allowed to dry before reassembly.

7. TROUBLESHOOTING

- **Missing Parts:** If you discover any missing parts upon opening the package, please contact the retailer or BANDAI customer support with proof of purchase and details of the missing components.
- **Broken Parts:** In case of accidental breakage during assembly or handling, small plastic parts can often be reattached using plastic cement or super glue (use sparingly and with caution).
- **Loose Connections:** If parts do not fit snugly, ensure that all nubs have been properly removed and that the parts are oriented correctly according to the diagrams.
