4. ASSEMBLY INSTRUCTIONS

Assembly is required for this product. Please follow these steps carefully. It is recommended to assemble the cart on a soft, clean surface to prevent scratches.

1. **Attach Wheels:** Carefully insert the four wheels into the designated holes at the bottom of one of the bamboo side frames. Ensure the two wheels with stoppers are placed on the same side for easier access.
2. **Secure Shelves to First Frame:** Align the first bamboo shelf with the lowest set of pre-drilled holes on the side frame with the wheels. Use the provided screws and Allen key to secure the shelf firmly. Repeat this for the middle and top shelves.
3. **Attach Second Frame:** Once all three shelves are attached to the first side frame, align the second bamboo side frame with the open ends of the shelves. Secure each shelf to the second frame using the remaining screws and Allen key.

5. OPERATING INSTRUCTIONS (USAGE)

- **Mobility:** To move the cart, release the stoppers on the wheels by pushing the lever upwards. Gently push or pull the cart to its

- **Stability:** To secure the cart in place, push the levers on the two stopper wheels downwards until they lock. This prevents unintended movement.

- **Placement:** The compact design is ideal for kitchens, bathrooms, offices, or any area requiring additional, movable storage.

6. MAINTENANCE

Proper care will extend the life and appearance of your bamboo rolling cart.

- **Drying:** After cleaning, dry the surfaces immediately with a clean, dry cloth to prevent water stains or moisture damage.
- **Regular Checks:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Environment:** Avoid prolonged exposure to direct sunlight or extreme humidity, which can affect bamboo.

7. TROUBLESHOOTING

If you encounter any issues with your rolling cart, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Cart is wobbly or unstable.	Screws are loose; uneven assembly.	Ensure all screws are tightened securely. Disassemble and reassemble if necessary, ensuring all parts are aligned correctly.
Wheels do not roll smoothly.	Debris in wheels; stoppers engaged.	Check for any debris (hair, lint) caught in the wheels and remove it. Ensure wheel stoppers are disengaged.
Items slide off shelves.	Cart is on an uneven surface; excessive movement.	Ensure the cart is on a level surface. Engage wheel stoppers when stationary. Utilize the shelf reinforcements to prevent items from falling.
