SETUP AND INSTALLATION

Before operating your new Brastemp dishwasher, please follow these essential setup and installation steps. This model is designed for installation in niches or on countertops, offering flexibility for your kitchen layout.

1. Unpacking

Carefully remove the dishwasher from its packaging. Inspect for any damage that may have occurred during transit. Retain all packaging materials until you are satisfied with the product's condition and operation.

3. Water and Drain Connections

Connect the water inlet hose to a cold water supply with a shut-off valve. Ensure all connections are tight to prevent leaks. Connect the drain hose to your kitchen sink's drain or a dedicated drain pipe, ensuring it is properly secured and allows for adequate drainage.

4. Electrical Connection

Plug the dishwasher into a grounded 110V electrical outlet. Do not use extension cords or adapters. Ensure the electrical supply meets the requirements specified in the product's technical data.

OPERATING INSTRUCTIONS

Operating your Brastemp dishwasher is straightforward thanks to its intuitive touch controls. Follow these steps for optimal cleaning results.

1. Loading Dishes

Load dishes into the dishwasher, ensuring they are arranged to allow water to reach all surfaces. Scrape off large food particles before loading. Utilize the specific baskets for cutlery and the adjustable shelf for various dish sizes. The dishwasher can accommodate up to 8 place settings, washing up to 88 individual pieces.

3. Selecting a Wash Cycle

The dishwasher offers 5 cycle options, including the special Acquaspray function. Use the touch controls to select the desired wash program based on the soil level and type of dishes. The Acquaspray function is ideal for pre-rinsing or for lightly soiled items.

4. Starting the Dishwasher

Close the dishwasher door firmly. Press the Start button to begin the selected wash cycle. The dishwasher will automatically proceed through the washing, rinsing, and drying stages.

MAINTENANCE AND CARE

Regular maintenance ensures the longevity and optimal performance of your Brastemp dishwasher.

1. Cleaning the Filters

Periodically check and clean the dishwasher filters located at the bottom of the wash tub. Remove any food debris to prevent blockages and ensure efficient drainage and cleaning.

2. Cleaning the Interior and Exterior

Wipe down the interior of the dishwasher, including the door seal, with a damp cloth to remove any residue. Clean the exterior surfaces with a soft, damp cloth and mild detergent. Avoid abrasive cleaners that could damage the brushed stainless steel finish.

3. Descaling

Depending on your water hardness, occasional descaling may be necessary. Use a dishwasher-safe descaling product according to its instructions, or run an empty cycle with white vinegar.

TROUBLESHOOTING

If you encounter issues with your dishwasher, refer to the following common troubleshooting tips before contacting service.

Dishwasher Does Not Start

- Ensure the power cord is securely plugged into a functional 110V outlet.
- Check if the circuit breaker has tripped.
- Make sure the dishwasher door is fully closed and latched.
- Verify that a wash cycle has been selected and the Start button pressed.

Dishes Are Not Clean

- Check if dishes are loaded correctly, allowing water spray to reach all surfaces.
- Ensure spray arms are not blocked by large items.
- Verify that the detergent dispenser was filled and opened during the cycle.
- Clean the dishwasher filters for any accumulated food debris.
- Select a more intensive wash cycle if dishes are heavily soiled.

Water Not Draining

- Inspect the drain hose for kinks or blockages.
- Clean the dishwasher filters.
- Check your sink's drain for any clogs.

Unusual Noises

- Ensure dishes are not interfering with the spray arms or other internal components.
- Check for foreign objects inside the dishwasher.

If these steps do not resolve the issue, please contact Brastemp customer support for further assistance.
