Vacmaster SCA0801 Carpet and Upholstery Spot Cleaner

INSTRUCTION MANUAL

1. Introduction

Thank you for purchasing the Vacmaster SCA0801 Carpet and Upholstery Spot Cleaner. This powerful and versatile machine is designed to effectively remove dirt, stains, and spills from carpets, rugs, upholstery, and car interiors. Please read this manual thoroughly before operation to ensure safe and efficient use of your new appliance.

2. Safety Information

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, or injury.

- Read all instructions before using the appliance.
- Do not immerse the appliance in water or other liquids.
- Do not use with a damaged cord or plug. If the appliance is not working as it should, has been dropped, damaged, left outdoors, or dropped into water, return it to a service center.
- Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Keep cord away from heated surfaces.
- Do not allow to be used as a toy. Close attention is necessary when used by or near children.
- Use only as described in this manual. Use only manufacturer's recommended attachments.
- Do not put any object into openings. Do not use with any opening blocked; keep free of dust, lint, hair, and anything that may reduce air flow.
- Turn off all controls before unplugging.
- Use extra care when cleaning on stairs.
- Do not use to pick up flammable or combustible liquids, such as gasoline, or use in areas where they may be present.
- Do not pick up anything that is burning or smoking, such as cigarettes, matches, or hot ashes.
- Do not use without tanks in place.
- Always disconnect from electrical outlet before connecting or disconnecting hose.

3. Package Contents

4. Setup

1. **Fill the Clean Water Tank:** The SCA0801 features a dual tank system. Locate the clean water tank (usually the smaller, clear tank). Remove it from the unit. Fill the tank with clean water up to the 'Max Fill' line. For enhanced cleaning, add the recommended amount of Vacmaster cleaning solution to the clean water tank as per the solution's instructions. Securely reattach the tank to the unit.
2. **Attach the Cleaning Tool:** Connect the desired cleaning tool (brush or wide nozzle) to the end of the flexible hose. Ensure it clicks securely into place.
3. **Prepare the Area:** Before cleaning, vacuum the area to remove any loose dirt or debris. Test the cleaning solution

on an inconspicuous area of the surface to be cleaned to ensure colorfastness.

5. Operating Instructions

The Vacmaster SCA0801 is designed for easy spot and stain removal. Follow these steps for effective cleaning:

1. **Power On:** Plug the unit into a suitable electrical outlet. Turn on the power switch located on the unit.
2. **Spray Solution:** Hold the cleaning tool over the stained area. Press the trigger on the cleaning tool handle to spray the cleaning solution onto the stain. Allow the solution to soak for a few moments, as recommended by the cleaning solution's instructions.
3. **Brush and Scrub:** Gently scrub the stained area with the brush attachment of the cleaning tool. Work the solution into the fibers to loosen the dirt and stain.
4. **Vacuum/Extract:** Release the spray trigger. Tilt the cleaning tool slightly and apply downward pressure while slowly pulling it across the treated area. The powerful suction will extract the dirty solution and loosened debris into the dirty water tank. Repeat this step until the liquid being extracted appears clean.
5. **Targeted Cleaning:** The integrated 6-foot spot remover hose allows you to easily clean hard-to-reach areas in your home, as well as seats and upholstery in your car.

6. Maintenance

Regular maintenance ensures the longevity and optimal performance of your spot cleaner.

1. **Empty and Clean Dirty Water Tank:** After each use, or when the dirty water tank reaches its maximum fill line, remove it from the unit. Carefully pour out the dirty water. Rinse the tank thoroughly with clean water.
2. **Clean the Clean Water Tank:** Periodically rinse the clean water tank to prevent residue buildup.
3. **Clean Tools and Hose:** Detach the cleaning tools and rinse them under running water. For the hose, you can run clean water through it by holding the tool over a sink and spraying clean water while the unit is on.
4. **Wipe Down Unit:** Wipe the exterior of the unit with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.
5. **Storage:** Ensure all tanks and tools are clean and dry before storing the unit. Store the spot cleaner in a cool, dry

place, away from direct sunlight and extreme temperatures. The compact design allows for easy storage in cabinets or closets.
