STANLEY 10-10826-010

STANLEY Quencher H2.0 FlowState Tumbler - Rose Quartz Modern

Model: 10-10826-010

Brand: STANLEY

INTRODUCTION

The STANLEY Quencher H2.0 FlowState Tumbler is designed for all-day hydration, featuring a durable recycled stainless steel construction and double-wall vacuum insulation. This modern tumbler in Rose Quartz offers a grippable soft matte finish and an ergonomic, comfort-grip handle for easy portability. Its advanced FlowState lid provides versatile drinking options, making it suitable for various activities and environments.

WHAT'S IN THE BOX

- STANLEY Quencher H2.0 FlowState Tumbler (Rose Quartz Modern)
- FlowState Lid
- Reusable Straw

SETUP

1. Initial Cleaning

Before first use, wash all components (tumbler, lid, and straw) thoroughly. Refer to the 'Maintenance' section for detailed cleaning instructions. The tumbler is designed for hand washing only.

2. Lid Assembly

The FlowState lid features a rotating cover with three positions:

- **Straw Opening:** Designed to resist splashes with a seal that holds the reusable straw in place.
- **Drink Opening:** For direct sipping without the straw.
- **Full-Cover Top:** For added leak resistance when not in use.

To attach the lid, align it with the tumbler opening and twist clockwise until securely fastened. Ensure the lid is properly aligned and tightened to prevent leaks.

OPERATING INSTRUCTIONS

1. Filling the Tumbler

Fill the tumbler with your desired beverage. The double-wall vacuum insulation is effective for keeping drinks cold for extended periods.

2. Using the FlowState Lid

Rotate the lid's cover to select your preferred drinking method:

- For straw use, align the opening with the straw. The silicone seal will hold the straw securely.
- For direct sipping, align the opening with the drink spout.
- To minimize spills, rotate the cover to the full-cover position. Note that while this position offers added leak resistance, the tumbler is primarily splash-resistant and not entirely leakproof if tipped over or tossed in a bag.

3. Car Cup Holder Compatibility

The tumbler features a narrow base designed to fit into most car cup holders, providing convenience during travel.

MAINTENANCE

Cleaning Instructions

To ensure the longevity and hygiene of your STANLEY Quencher H2.0 FlowState Tumbler, follow these care instructions:

- **Hand Wash Only:** All components of the tumbler (body, lid, straw) should be hand washed.
- Use warm water and mild dish soap.
- For thorough cleaning, disassemble the lid by unscrewing it from the tumbler and removing the straw. Clean all parts separately.
- Rinse thoroughly and allow all parts to air dry completely before reassembling or storing.

TROUBLESHOOTING

1. Leaking Issues

If your tumbler is leaking, ensure the lid is securely fastened and the rotating cover is in the full-cover position. While the FlowState lid offers enhanced splash resistance, it is not entirely leakproof if the tumbler is tipped or inverted, especially with the straw inserted.

2. Reduced Temperature Retention

If your drinks are not staying cold as expected, verify that the lid is properly sealed and there are no gaps. Extreme external temperatures can also affect insulation performance.

SPECIFICATIONS

Feature	Detail
Brand	STANLEY

Model Number	10-10826-010
Color	Rose Quartz
Style	Modern
Capacity	20 Ounces
Material	Stainless Steel (Recyclable, BPA Free)
Special Feature	Vacuum Insulated
