## 3. SETUP INSTRUCTIONS

- 1. Assemble the Light Stand:** Unfold the legs of the 70" telescoping light stand until stable. Extend the stand to your desired height and secure the sections using the locking mechanisms.
- 2. Attach the Ring Light:** Mount the Lume Cube Ring Light Pro onto the top of the light stand. Ensure it is securely fastened using the screw mechanism.
- 3. Insert Smartphone Mount:** Place the adjustable smartphone mount into the designated slot within the center of the ring light. Adjust its angle as needed.
- 4. Connect Power:** Connect the power cord to the ring light and plug it into a power outlet. The internal battery can also be used for cordless operation once charged.

## 4. OPERATING INSTRUCTIONS

### 4.1 Power On/Off

Locate the power switch on the back of the ring light. Flip it to the 'ON' position to power on the device. Flip it to 'OFF' to power down.

### 4.2 Adjusting Brightness and Color Temperature

Use the manual adjustment dials on the back of the ring light or the included wireless remote control to fine-tune brightness (1-100%) and color temperature (2700K-7500K). The LCD screen will display the current settings.

## 4.3 Using the Wireless Remote Control

The wireless remote allows for convenient adjustment of brightness and color temperature from a distance. Ensure batteries are inserted correctly into the remote.

## 4.4 Using the USB Charge Ports

Two 5V USB-A charge ports are located on the back of the ring light, allowing you to power or charge your smartphone or other USB-powered accessories while using the light.

## 4.5 Adjusting the Smartphone Mount

The Lume Cube Designed Phone Mount allows for a 180-degree flip to switch between front and rear-facing cameras without removing the phone, and a 360-degree rotation for instant portrait or landscape mode changes.

# 5. KEY FEATURES

- **Internal Rechargeable Battery:** The Ring Light Pro features an internal rechargeable battery, offering up to 70 minutes of use at full brightness or 2 hours at lower power, providing freedom from power outlets.
- **Edge-Lit LED Lighting:** Equipped with 256 high-quality inward-facing LEDs and a built-in diffuser, it delivers 1700 lux at 0.5 meters for soft, flattering, studio-quality illumination.
- **Bi-Color Lighting:** Offers a color temperature range of 2700K-7500K, allowing users to select from cool blue to warm amber tones for various moods or accurate skin tones. It boasts 1500 Lumens and a 96+ CRI Rating.
- **Remote Controller and LCD:** A wireless remote control enables full adjustment of light settings from a distance. The smart LCD screen displays battery life, brightness, and color settings.
- **Simple Operation:** Designed for ease of use with intuitive onboard controls and a traditional remote, eliminating the need for complex apps.
- **Lume Cube Designed Phone Mount:** Unique mount with 180-degree flip and 360-degree rotation capabilities for seamless camera orientation changes.
- **Complete Kit with Case:** Includes the ring light, stand, adjustable smartphone mount, wireless remote, power cord, and a premium travel case for portability and protection.

## 6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the ring light and stand. Avoid abrasive cleaners or solvents.
- **Battery Care:** For optimal battery life, fully charge the device before first use and periodically if not used for extended periods. Avoid extreme temperatures.
- **Storage:** Store the Ring Light Pro and its accessories in the provided premium travel case to protect it from dust and damage.

## 7. TROUBLESHOOTING

- **Light Not Turning On:** Ensure the power cord is securely connected and plugged into a working outlet, or that the internal battery is charged. Check the power switch position.
- **Remote Control Not Responding:** Verify that the remote's batteries are correctly inserted and have sufficient charge. Ensure there are no obstructions between the remote and the ring light.
- **Inconsistent Brightness/Color:** Check the LCD screen for current settings. Adjust using the dials or remote. Ensure the light is not overheating (though designed for efficient heat dissipation).
- **Phone Mount Instability:** Ensure the smartphone mount is firmly secured in its slot and the phone is properly gripped by the mount's spring-loaded mechanism.
