2. SETUP AND FITTING

2.1 Sizing

Refer to the KLIM sizing chart to select the appropriate size. The XC Lite pants are designed for a regular fit. Some users may find that ordering one size down from their usual pant size provides a more secure fit, especially when worn with protective gear.

2.2 Wearing with Protective Gear

These pants are designed to accommodate knee braces or pads comfortably. Ensure that any internal or external protective gear fits without restricting movement or causing discomfort. The articulated design allows for a full range of motion.

4. MAINTENANCE AND CARE

4.1 Washing Instructions

To maintain the integrity and longevity of your KLIM XC Lite pants, follow these care instructions:

- Machine wash cold on a gentle cycle.
- Do not bleach.
- Do not iron.
- Hang dry away from direct heat.
- Do not dry clean.

4.2 Storage

Store the pants in a cool, dry place away from direct sunlight and extreme temperatures. Ensure they are clean and completely dry before storage to prevent mildew or material degradation.

5. TROUBLESHOOTING

5.1 Fit Issues

If the pants feel too loose or too tight, re-evaluate your size against the KLIM sizing chart. Consider the type of protective gear you wear underneath, as this can affect the overall fit.

5.2 Material Wear

The XC Lite pants feature lightweight materials for ventilation. Be aware that thinner material areas, particularly around the knees, may be more susceptible to damage from contact with hot engine components (e.g., exhaust pipes). Exercise caution to prevent burns or melting of the fabric.
