eXtremeRate Scarlet Red Real Metal Buttons (RMB) Version RISE Remap Kit for PS5 Controller - Instruction Manual

Model: XPFJ7004G3

1. INTRODUCTION

This manual provides detailed instructions for installing and using the eXtremeRate Scarlet Red Real Metal Buttons (RMB) Version RISE Remap Kit. This kit is designed to transform your standard PlayStation 5 controller into a professional eSport elite controller by adding two ergonomic, programmable back buttons. The metal back paddles are crafted from high-quality metal for enhanced durability and a tactile feel. The K1 and K2 buttons require a specific pressure to activate, which helps prevent accidental presses during intense gameplay.

2. COMPATIBILITY

This kit is compatible with PlayStation 5 controllers with motherboard models BDM-030, BDM-040, and BDM-050. It is **NOT** compatible with BDM-010 or BDM-020 models.

To ensure compatibility, please verify your controller's BDM model before proceeding with installation. You can check your controller's BDM model using one of the following methods:

1. **Method 1: Visual Inspection of R2 Trigger Spring**
   Carefully inspect the R2 trigger mechanism. The presence and position of the spring can indicate the BDM model. Refer to the image below for visual guidance.

2. **Method 2: Software Check via PC**
   Connect your PS5 controller to a PC using a USB data cable and visit the eXtremeRate BDM check tool online. This tool will identify your controller's BDM model.

For specific instructions on soldering (if you choose to remap L3, R3, or Touchpad buttons), please follow the video guide carefully. If you only intend to remap face buttons and shoulder buttons, soldering may not

be required.

5. Programming Back Buttons

The RISE Remap Kit allows you to assign up to 15 different controller functions to the two back buttons (K1 and K2). These functions include: X, O, Triangle, Square, Up, Down, Left, Right, L1, L2, R1, R2, L3, R3, and Touchpad Button.

Programming Steps:

1. Press and hold the Setting Button (located on the back attachment) until the LED indicator lights up.
2. Press the back button (K1 or K2) you wish to program.
3. Press the desired function button (e.g., X, O, L1) on the front of the controller.
4. Press the Setting Button again to save the mapping. The LED indicator will turn off.
