5. MAINTENANCE

Proper care and maintenance will extend the life of your Yaheetech bed frame.

- **Cleaning:** Clean the faux leather upholstery with a dry or slightly damp cloth. Avoid harsh chemicals or abrasive cleaners, as these may damage the material.
- **Hardware Check:** Periodically check all bolts and screws to ensure they remain tight. Loose connections can affect the stability and longevity of the bed frame.
- **Slat Inspection:** Inspect the wooden slats regularly for any signs of wear or damage. Replace any broken slats promptly to maintain mattress support.
- **Drawer Care:** Keep the storage drawers free of excessive weight to ensure smooth operation and prevent damage to the wire netting.

The faux leather upholstery is designed for durability and easy cleaning. Regular dusting and occasional wiping with a damp cloth are sufficient to maintain its appearance.

6. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common problems and solutions:

- **Bed Frame is Wobbling:**
Ensure all bolts and screws are securely tightened. Check that the center support legs are firmly on the floor and properly aligned.
- **USB Ports Not Functioning:**
Verify that the bed frame's power adapter is correctly plugged into both the bed frame and a working wall outlet. Check the power cord for any visible damage. If the issue persists, the power cable or USB module may require replacement.
- **Storage Drawers Do Not Slide Smoothly:**
Check for any obstructions under the bed or within the drawer tracks. Ensure the drawer wheels are clean and free of debris. Verify that the drawers are not overloaded.
- **Slats Breaking or Sagging:**
Ensure the mattress weight does not exceed the bed frame's capacity (705 lb). Verify that the slats are correctly installed and evenly distributed. If individual slats are damaged, they may need to be replaced.
