Setup

Battery Installation

The NK6 Replacement Remote Control operates on two (2) 1.5V AAA Alkaline batteries. Batteries are not included with the remote control and must be purchased separately.

1. Locate the battery compartment on the back of the remote control.
2. Slide open the battery compartment cover.
3. Insert two (2) AAA Alkaline batteries, ensuring the positive (+) and negative (-) terminals align correctly with the markings inside the compartment.
4. Close the battery compartment cover securely.

Once batteries are installed, the remote control is ready for immediate use with compatible Nakamichi NK6 Sound Bar models. No additional programming or pairing is required.

Maintenance

Proper care and maintenance will extend the life of your remote control.

- **Cleaning:** Use a soft, dry cloth to clean the remote control. Do not use liquid cleaners or abrasive materials, as they may damage the surface or internal components.
- **Battery Replacement:** Replace batteries when the remote's responsiveness decreases or it stops functioning. Always replace both batteries at the same time with new AAA Alkaline batteries. Do not mix old and new batteries, or different types of batteries.
- **Storage:** If the remote control will not be used for an extended period, remove the batteries to prevent leakage and potential damage to the remote. Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Drops:** Protect the remote from physical impact, as drops can damage internal circuitry.

Troubleshooting

If you experience issues with your NK6 Replacement Remote Control, refer to the following common solutions:

- **Remote Not Responding:**

- Check if the batteries are inserted correctly with the correct polarity (+/-).
- Replace the batteries with fresh AAA Alkaline batteries.
- Ensure there are no obstructions between the remote control and the sound bar's infrared receiver.
- Confirm that the sound bar is powered on.

- **Limited Range:**
  - Ensure you are within the effective operating range of the sound bar's IR receiver.
  - Check for any strong light sources (e.g., direct sunlight, fluorescent lights) that might interfere with the IR signal.
- **Specific Buttons Not Working:**
  - Clean the remote control's surface, especially around the non-functioning buttons, to remove any dirt or debris.
  - If only certain buttons are unresponsive after checking batteries and cleaning, the remote may be damaged and require replacement.
