6. MAINTENANCE

- **Cleaning:** Wipe the upholstered surfaces with a dry cloth. For minor spills, use a slightly damp cloth and mild soap, then dry immediately. Avoid harsh chemicals or abrasive cleaners.
- **Fasteners:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten as necessary to maintain stability and prevent noise.
- **LED Lights:** Ensure the LED light strip and power connections are free from dust and debris. Do not attempt to replace individual LED bulbs.

7. TROUBLESHOOTING

7.1 Bed Frame is Noisy/Squeaking

- **Check Connections:** Ensure all bolts and screws are securely tightened. Loose connections are a common cause of noise.

- **Slat Placement:** Verify that all wooden slats are correctly seated and secured by the unique lock design.
- **Uneven Floor:** If the floor is uneven, the bed frame may wobble. Try placing shims under the legs to stabilize it.

7.2 LED Lights Not Working

- **Power Connection:** Ensure the power adapter is securely plugged into both the bed frame and a working wall outlet.
- **Remote Battery:** Check if the remote control battery needs replacement.
- **Light Strip Connection:** Verify that the LED light strip is properly connected to its power source on the headboard.

7.3 USB/Type-C Ports Not Charging

- **Power Connection:** Confirm the bed frame's main power adapter is plugged in and receiving power. The charging ports draw power from this connection.
- **Cable Integrity:** Test with a different charging cable to rule out a faulty cable.
- **Device Compatibility:** Ensure your device is compatible with standard USB/Type-C charging.
