6. MAINTENANCE

Regular maintenance will extend the life of your cat tree and keep it hygienic for your pets:

- **Cleaning:** Use a lint roller or a vacuum cleaner to easily remove cat fur, dirt, and crumbs from the plush surfaces and scratching posts.

- **Spot Cleaning:** For minor stains, gently wipe with a damp cloth and mild pet-safe cleaner. Avoid excessive moisture.
- **Inspection:** Periodically check all screws and connections to ensure they remain tight. Re-tighten if necessary.
- **Damage Check:** Inspect scratching posts and plush fabric for significant wear or damage. While sisal is durable, it will eventually wear down.

7. TROUBLESHOOTING

- **Instability:** If the cat tree feels wobbly, ensure all screws are tightened. Verify that the anti-tipping device is correctly installed and secured to a wall stud.
- **Missing Parts:** If you find any parts missing upon unboxing, please refer to the 'Package Contents' section and contact customer support with your purchase details.
- **Difficulty Assembling:** Review the 'Assembly Instructions' and diagrams carefully. Ensure you are using the correct screws for each part. If issues persist, contact customer support.
- **Moving the Cat Tree:** When relocating the cat tree, always lift it from the bottom to maintain structural integrity and prevent damage.
