TROUBLESHOOTING

Issue: Parts do not align during assembly.

Solution: Some components, particularly the leg frames, may require slight angling to fit correctly. Do not force parts. Gently adjust the angle of the pieces until the screw holes align, then insert and tighten screws. Ensure you are following the assembly steps in the correct order.

Issue: Desk feels wobbly after assembly.

Solution: Check that all screws are fully tightened. Adjust the leveling foot pads at the bottom of each leg. Rotate them to extend or retract until the desk is stable on your floor surface.

Issue: Missing parts or damaged components.

Solution: If you encounter any missing or damaged parts, please contact HLDIRECT customer service immediately for assistance. Refer to the "Warranty and Support" section for contact information.
